

Breakdown Voltage 30KV Self Curing Silicone Pad UV Resistant For Busbar Insulation

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: ZL525W
- Minimum Order Quantity: 300PCS
- Supply Ability: 60000 PCS per month

Product Specification

- Temperature Resistance: -40~85°C
- Application: Busbar Waterproof Insulation,Electrical Connector Insulation And Waterproofing,Insulation Repair For Cables,Sealed And Insulated Protection Of Overhead Line Clamps,Insulation Protection For Exposed Metal Positions Of Power Conductors,Used For The Partial I
- Chemical Resistance: Excellent
- Uv Resistance: Good
- Size: Customizable
- Shelf Life: 12 Months
- Material: Silicone Rubber
- Hardness: Shore A 30-80

Product Description

Product Description:

Self Curing Silicone Pad

The Self Curing Silicone Pad is a versatile and durable product that is made from high quality silicone material. It is specifically designed for various industrial applications where a flexible, non-toxic, and heat resistant material is needed.

Material

The Self Curing Silicone Pad is made from 100% pure silicone material, ensuring its high quality and safety. Silicone is a synthetic polymer that is known for its excellent properties such as high temperature resistance, flexibility, and chemical inertness. This makes the Self Curing Silicone Pad a perfect choice for various industrial applications.

Hardness

The hardness of the Self Curing Silicone Pad can be customized according to the specific needs of the customer. It has a Shore A hardness range of 30-80, making it suitable for different levels of compression and flexibility. This allows the product to withstand heavy loads and still retain its shape and properties.

Color

The Self Curing Silicone Pad comes in a clear color, making it easy to see through and work with. This allows for precise and accurate measurements and applications. The clear color also gives the product a professional and clean appearance.

Shelf Life

The Self Curing Silicone Pad has a long shelf life of 12 months from the date of manufacture. This means that the product can be stored for a longer period of time without compromising its quality and performance. This makes it a cost-effective option for businesses that require a reliable and durable product.

UV Resistance

In addition to its other properties, the Self Curing Silicone Pad also has good UV resistance. This means that it can withstand exposure to sunlight and maintain its durability and performance. This makes it suitable for outdoor applications where exposure to sunlight is inevitable.

Conclusion

The Self Curing Silicone Pad is a high-quality product that is perfect for various industrial applications. Its excellent properties such as high temperature resistance, flexibility, and chemical inertness make it a reliable and durable choice. With its customizable hardness, clear color, long shelf life, and good UV resistance, the Self Curing Silicone Pad is the perfect solution for your industrial needs.

Features:

Product Name: Self Curing Silicone Pad

Color: Black

Electrical Insulation: Excellent

Tear Strength: 10-30 N/mm

Hardness: Shore A 30-80

Temperature Resistance: Up To -40~85°C

Technical Parameters:

Product Name	Self Curing Silicone Pad
Tensile Strength	1.5-2 MPa
Tear Strength	10-30 N/mm
Hardness	Shore A 30-80
Color	Black
Application	Busbar Waterproof Insulation, Electrical Connector Insulation And Waterproofing, Insulation Repair For Cables, Sealed And Insulated Protection Of Overhead Line Clamps, Insulation Protection For Exposed Metal Positions Of Power Conductors, Used For The Partial Insulation Restoration Of Overhead Wires, Used For Insulating The Bare Metal Parts Within Switchgear
Size	Customizable

Self-Curing Time	24 Hours
Elongation At Break	300-500%
Temperature Resistance	-40~85°C
Electrical Insulation	Excellent

Applications:

Self Curing Silicone Pad - Your Ultimate Solution for Electrical Insulation and Chemical Resistance

Brand Name: zhonglei

Place of Origin: China

Color: Black

Size: Customizable

Material: Silicone Rubber

The Self Curing Silicone Pad by zhonglei is a revolutionary product that is designed to provide excellent electrical insulation and chemical resistance in various industrial and commercial applications. Made with high-quality silicone, this pad offers a perfect combination of durability, flexibility, and performance.

Excellent Electrical Insulation

The Self Curing Silicone Pad is specifically designed to provide excellent electrical insulation. It is capable of withstanding high voltage and current, making it an ideal choice for electrical equipment and systems. Whether you are working with high-voltage power supplies or delicate electronic components, this pad ensures maximum safety and protection for your equipment.

Excellent Chemical Resistance

The Self Curing Silicone Pad is also known for its excellent chemical resistance. It is resistant to a wide range of chemicals, including acids, alkalis, solvents, oils, and more. This makes it a perfect choice for use in chemical plants, laboratories, and other industries where exposure to harsh chemicals is common. With this pad, you can rest assured that your equipment will remain safe and protected from corrosion and damage caused by chemical exposure.

Customizable Size

At zhonglei, we understand that every application has unique requirements. That's why our Self Curing Silicone Pad is fully customizable in terms of size. Whether you need a small pad for delicate electronic components or a large pad for industrial equipment, we can provide you with a customized solution that meets your specific needs.

Clear and Versatile

The Self Curing Silicone Pad is clear in color, making it perfect for applications where visibility is important. It allows for easy inspection and monitoring of equipment without the need for removal. Additionally, this pad is highly versatile and can be used in a variety of industries, including electronics, automotive, aerospace, and more.

Don't compromise on safety and performance when it comes to electrical insulation and chemical resistance. Choose the Self Curing Silicone Pad by zhonglei for a reliable and durable solution that meets all your requirements. Contact us today to learn more!

Customization:

Self Curing Silicone Pad - Customized Service

Brand Name: zhonglei

Place of Origin: China

Hardness: Shore A 30-80

Application: Busbar Waterproof Insulation, Electrical Connector Insulation And Waterproofing, Insulation Repair For Cables, Sealed And Insulated Protection Of Overhead Line Clamps, Insulation Protection For Exposed Metal Positions Of Power Conductors, Used For The Partial Insulation Restoration Of Overhead Wires, Used For Insulating The Bare Metal Parts Within Switchgear

Color: Clear

Temperature Resistance: Up To 250°C

Self-Curing Time: 24 Hours

Packing and Shipping:

Product Name: Self Curing Silicone Pad

Packaging and Shipping

Our Self Curing Silicone Pad comes in a sturdy, sealed box to ensure safe delivery to our customers. The packaging is designed to protect the product from damage during shipping and handling.

Each box contains 10 individual pads, each wrapped in a plastic sleeve to keep them clean and dust-free. The box is labeled with the product name, quantity, and any relevant safety warnings.

We also offer customized packaging options for bulk orders, including branded boxes and custom labeling.

Shipping Information

We offer worldwide shipping for our Self Curing Silicone Pad. Our standard shipping method is through reputable courier services, such as DHL, FedEx, or UPS. Customers can also choose to use their preferred shipping provider.

For domestic orders, we offer both standard and expedited shipping options. Standard shipping typically takes 3-5 business days, while expedited shipping takes 1-2 business days.

For international orders, shipping times may vary depending on the destination country and customs clearance procedures. We will provide tracking information for all orders so customers can track their shipment's progress.

Customers are responsible for any customs or import fees that may apply to their order.

Order Processing

We strive to process and ship all orders within 1-2 business days. Orders placed on weekends or holidays will be processed on the next business day.

Once the order is shipped, customers will receive a confirmation email with their tracking information.

If there are any delays or issues with the order, our customer service team will reach out to the customer as soon as possible.

Thank you for choosing our Self Curing Silicone Pad. We hope it brings you satisfaction and convenience in your daily life.

FAQ:

Q: What is the brand name of this product?

A: The brand name is zhonglei.

Q: Where is this product made?

A: This product is made in China.

Q: What is the main function of this product?

A: The main function of this product is self-curing, meaning it can harden without the use of additional curing agents or heat.

Q: What materials is this product made of?

A: This product is made of silicone, a durable and flexible material.

Q: Is this product safe for food contact?

A: Yes, this product is made of food-grade silicone which is safe for food contact.

Q: Is this product suitable for outdoor use?

A: Yes, this product is weather-resistant and can be used outdoors.
