

Blue Flame Retardant Self Amalgamating Silicone Tape Waterproof 5cm Width

Basic Information

Quantity:

Place of Origin: China
Brand Name: zhonglei
Model Number: zl6030si
Minimum Order 500 rolls

• Supply Ability: 50000 Rolls per month

Product Specification

Dielectric Strength: 400 V/mil
Hs Code: 40082100
Adhesion Strength: High
Uv Resistant: Yes
Width: 5cm
Color: Blue
Maximum Voltage: 35kv

Application: Electrical Insulation, Pipe Repair, Emergency

Hose Repair, Etc.

Highlight: Flame Retardant Self Amalgamating Silicone

Tape

, Blue Self Amalgamating Silicone Tape, Self Amalgamating Tape Waterproof 5cm

Product Description:

Product Overview

The Insulating Self Fusing Tape is a versatile and durable product designed to provide reliable protection in various situations. Made from high-quality waterproof silicone, this tape is perfect for a variety of applications including electrical insulation, pipe repair, emergency hose repair, and more.

Key Features

Waterproof: This silicone tape is designed to withstand exposure to water and other liquids, making it perfect for use in wet environments.

High Flexibility: With its high flexibility, this tape can easily conform to any shape or surface, ensuring a tight and secure seal.

Versatile Application: Whether you need to insulate electrical wires, fix a leaky pipe, or make emergency repairs on a hose, this tape has got you covered.

Durable: Made from premium quality materials, this self fusing tape is highly resistant to heat, chemicals, and UV rays, ensuring long-lasting protection.

Easy to Use: Simply stretch and wrap the tape around the desired area, and it will fuse together within minutes, creating a strong and permanent bond.

5 M Length, 5 CM Width: Each roll of this tape measures 5M in length and 5CM in width, providing enough coverage for multiple uses. How to Use

Using the Insulating Self Fusing Tape is quick and easy. Follow these simple steps:

Clean and dry the surface or area where the tape will be applied.

Stretch the tape to about double its original length.

Wrap the tape tightly around the desired area, overlapping the layers for maximum adhesion.

Press the tape firmly to activate the self-fusing process.

Allow the tape to fuse together for a few minutes, and it will create a strong and waterproof seal.

With the Insulating Self Fusing Tape, you can easily and quickly fix any leaks or protect your electrical equipment from moisture and other environmental factors. Its high flexibility, durability, and ease of use make it an essential tool for any DIY enthusiast, plumber, or electrician. Get yours today and experience the convenience and reliability of this waterproof silicone wrapping tape.

Features:

Product Name: Self Fusing Silicone Tape Classification: Inorganic Insulation Material

Color: Blue UV Resistant: Yes Width:5CM Waterproof: Yes

Self Bonding Silicone Tape Stretchable Silicone Repair Tape Heat Resistant Silicone Tape

Technical Parameters:

Technical Parameters	Product Description
Product Name	Self Fusing Silicone Tape
Material	Self Fusing Silicone
Color	Blue
Width	5CM
Length	5M
Maximum Voltage	35kV
Flexibility	High
Dielectric Strength	400 V/mil
UV Resistant	Yes
Application	Electrical Insulation, Pipe Repair, Emergency Hose Repair, etc.
Feature	Heat-Resistant, Insulating Self Fusing Tape, Self Amalgamating Silicone Tape, No-Residue Self Fusing Tape

Applications:

Self Fusing Silicone Tape - Product Application

Self Fusing Silicone Tape is an innovative and versatile product that can be used in various situations. With its unique properties, this tape provides a reliable and efficient solution for different needs.

Flexibility: High

The Self Fusing Silicone Tape is highly flexible, making it ideal for use in situations where traditional tapes may not work. It can easily conform to any shape or surface, allowing for a secure and tight seal.

Temperature Resistance: Up To 500°F

The Self Fusing Silicone Tape is designed to withstand extreme temperatures of up to 500°F. This makes it suitable for use in high-temperature environments, such as industrial settings and automotive repairs.

Dielectric Strength: 400 V/mil

The Self Fusing Silicone Tape has a high dielectric strength of 400 V/mil, making it an excellent choice for electrical insulation. It can effectively seal and protect wires and cables from moisture and other environmental factors.

Length: 10 Feet

This Self Fusing Silicone Tape comes in a length of 10 feet, providing enough tape for multiple uses. It can be easily cut to the desired length, making it convenient to use for various applications.

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

The Self Fusing Silicone Tape is suitable for a wide range of applications, including:

Electrical Insulation: The tape's high dielectric strength and temperature resistance make it an ideal choice for electrical insulation. It can be used to seal and insulate wires, cables, and other electrical components.

Pipe Repair: The Self Fusing Silicone Tape can provide a strong and waterproof seal for damaged or leaking pipes. It can withstand high pressures and extreme temperatures, making it a reliable solution for pipe repairs.

Emergency Hose Repair: In emergency situations, the Self Fusing Silicone Tape can be used to temporarily repair hoses and prevent leaks. Its strong adhesion and resistance to heat and moisture make it a guick and effective solution.

And more: The Self Fusing Silicone Tape can also be used for various other applications, such as sealing and protecting outdoor equipment, repairing insulation on hot water pipes, and even as a grip for tools and handles.

With its self-amalgamating technology, the Self Fusing Silicone Tape creates a strong bond with itself, creating a seamless and noresidue seal. It is also self-adhesive, eliminating the need for additional tools or adhesives, making it easy and convenient to use in any situation.

Customization:

Customization Service for Self Fusing Silicone Tape

Introducing our high-quality Self Fusing Silicone Tape, the perfect solution for all your insulation needs. Our product is specially designed to provide excellent protection and insulation for various electrical applications. With our customization service, you can personalize the tape according to your specific requirements. Here are some of the key attributes of our product:

Maximum Voltage: With a maximum voltage of 35kv, our tape is suitable for a wide range of electrical applications, making it a reliable choice for both residential and industrial use.

Width: Our tape comes in a width of 1 inch, providing you with enough coverage and flexibility for your insulation needs.

Classification: Made from inorganic insulation material, our tape offers superior performance and durability compared to traditional organic insulation materials.

Flexibility: Our tape has high flexibility, making it easy to wrap around irregular shapes and corners without compromising its insulation capabilities.

Length: Each roll of our tape is 10 feet long, giving you enough tape to cover multiple projects or to have on hand for future use. Our No-Residue Self Fusing Tape is a self bonding silicone tape that fuses to itself to create a strong and permanent seal. This feature makes it easy to use and eliminates the need for additional adhesives. It is also waterproof, making it ideal for outdoor and underwater applications. Our Self Bonding Silicone Tape is the perfect solution for all your insulation needs, providing reliable and long-lasting protection against moisture, heat, and other environmental factors.

Experience the convenience and reliability of our Waterproof Silicone Wrapping Tape by customizing it to fit your specific needs. Contact us now to learn more about our customization service and get your personalized Self Fusing Silicone Tape today!

Packing and Shipping:

Self Fusing Silicone Tape Packaging and Shipping

Packaging:

The Self Fusing Silicone Tape is packaged in a sturdy and durable plastic container to ensure safe delivery. The tape is tightly wound and sealed to prevent any damage during transportation.

Shipping:

The tape is shipped worldwide through reliable and efficient shipping methods. It is carefully handled and packaged to avoid any damage during transit. The shipping options include:

Standard shipping: This option delivers the tape within 5-7 business days.

Expedited shipping: For urgent orders, this option delivers the tape within 2-3 business days.

International shipping: The tape can be shipped to any international destination, with delivery times varying based on the location. Customers can also track their shipment using the provided tracking number. In case of any issues with the shipping, our customer service team is available to assist and resolve any problems.

FAQ:

- A: Self Fusing Silicone Tape is a type of tape made from specially formulated silicone rubber that is self-adhesive and easily bonds to
- Q: What is the temperature range for using Self Fusing Silicone Tape?
- A: The temperature range for using Self Fusing Silicone Tape is typically between -60°C to 260°C, making it suitable for a wide range of applications.
- Q: Can Self Fusing Silicone Tape be used for electrical insulation?
- A: Yes, Self Fusing Silicone Tape is highly resistant to electrical currents and can be used for electrical insulation and sealing of wires and
- Q: Is Self Fusing Silicone Tape waterproof?
- A: Yes, Self Fusing Silicone Tape is waterproof and can be used for sealing leaks in pipes and hoses.
- Q: How does Self Fusing Silicone Tape bond to itself?
- A: Self Fusing Silicone Tape bonds to itself through a process called vulcanization, where the silicone rubber molecules cross-link and form a strong bond.
