

Blue Waterproof Insulation Self Fusing Silicone Tape Heat Resistant 5M Length

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 500 rolls
- Packaging Details: 8
- Supply Ability: 50000 Rolls per month

Product Specification

- Feature: Heat-Resistant
- Maximum Voltage: 35kv
- Length: 5M
- Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.
- Hs Code: 40082100
- Uv Resistant: Yes
- Temperature Resistance: Up To 500°F
- Dielectric Strength: 20kv/mm
- Highlight: **Insulation Self Fusing Silicone Tape ,
Self Fusing Silicone Tape 5M ,
Waterproof Self Fusing Tape Heat Resistant**

Product Description

Product Description:

Self Fusing Silicone Tape

This Self Fusing Silicone Tape is a revolutionary product that is perfect for a wide range of applications. It is a versatile and durable tape that can be used for electrical insulation, pipe repair, emergency hose repair, and much more.

Application

The Self Fusing Silicone Tape is perfect for a variety of applications. It is commonly used for electrical insulation, providing a strong and reliable layer of protection for electrical wiring and components. It is also ideal for pipe repair, allowing you to quickly fix leaks and cracks in pipes without the need for any additional tools or materials. In addition, this tape is perfect for emergency hose repair, making it an essential item for any home, workshop, or outdoor adventure.

Waterproof

One of the key features of this Self Fusing Silicone Tape is its waterproof nature. This tape provides a tight seal that is resistant to water, making it perfect for use in wet environments. Whether you need to repair a leaky pipe or fix a hose on a rainy day, this tape can withstand the elements and keep your repairs secure.

Maximum Voltage: 35kv

This tape is designed to handle high voltage applications with ease. With a maximum voltage of 35kv, it is perfect for use in electrical repairs and installations. It provides reliable insulation and protection, ensuring that your electrical systems are safe and secure.

Heat-Resistant

The Self Fusing Silicone Tape is also highly heat-resistant, making it suitable for use in extreme temperature conditions. It can withstand temperatures of up to 500°F, making it perfect for use in hot environments or for high-temperature applications.

No-Residue Self Fusing Tape

This tape is designed to stick to itself without leaving any residue. Unlike other tapes that can leave a sticky mess behind, this Self Fusing Silicone Tape will not leave any residue on your hands or the surfaces it is applied to. This makes it convenient and easy to use, with no clean-up required.

Self Sealing Silicone Tape

The Self Fusing Silicone Tape is also self-sealing, meaning that it forms a strong and durable bond with itself. This eliminates the need for any additional adhesives or tools, making it a convenient and reliable solution for a wide range of repairs.

Self Amalgamating Silicone Tape

This tape is self-amalgamating, which means that it fuses together when stretched and wrapped around an object. This creates a strong and permanent bond that can withstand extreme conditions and provide long-lasting repairs.

Overall, the Self Fusing Silicone Tape is a versatile, durable, and essential product for any home, workshop, or outdoor adventure. With its waterproof, heat-resistant, and self-fusing properties, it is perfect for a wide range of applications and provides reliable and long-lasting repairs. Order yours today and experience the convenience and effectiveness of this amazing product!

Features:

Product Name: Self Fusing Silicone Tape

Uv Resistant: Yes

Flexibility: High

Classification: Inorganic Insulation Material

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Length: 5 M

Non-Tacky Silicone Tape

Self Adhesive Silicone Tape

Self-Bonding Silicone Tape

Technical Parameters:

Product Name	Self Fusing Silicone Tape
Adhesion Strength	High
Waterproof	Yes

Temperature Resistance	Up To 500°F
Color	Blue
Material	Self Fusing Silicone
Maximum Voltage	35kv
Feature	Heat-Resistant
Flexibility	High
UV Resistance	Yes
Classification	Inorganic Insulation Material
Product Description	Self Amalgamating Silicone Tape is a non-tacky, self adhesive tape made of high quality self fusing silicone. It is designed to provide high adhesion strength, excellent waterproofing, and temperature resistance up to 500°F. The tape is available in black color and is perfect for various applications that require heat-resistant and flexible properties. It is also UV resistant and classified as an inorganic insulation material, making it a reliable and durable choice for all your sealing and repairing needs.

Applications:

Self Fusing Silicone Tape: The Ultimate Solution for Your Insulation Needs

Introducing the innovative Self Fusing Silicone Tape, the perfect solution for all your insulation needs. This versatile tape is designed to provide maximum protection and durability in various applications. With its unique properties, this tape is a must-have for any home, office, or industrial setting.

Maximum Voltage: 35kv

The Self Fusing Silicone Tape is designed to withstand high voltage levels up to 35kv, making it the perfect choice for electrical and industrial applications. This tape provides superior insulation and protection against electrical currents, ensuring the safety of your equipment and surroundings.

Flexibility: High

One of the key features of this tape is its high flexibility. The Self Fusing Silicone Tape can easily conform to any shape or surface, ensuring a tight and secure seal. This makes it ideal for use in tight spaces and irregular surfaces, providing a hassle-free and efficient insulation solution.

Temperature Resistance: Up To 500°F

The Self Fusing Silicone Tape is designed to withstand extreme temperatures, making it suitable for a wide range of applications. With a temperature resistance of up to 500°F, this tape can be used in high-temperature environments without compromising its effectiveness. It can withstand extreme heat, making it perfect for use in industrial settings, automotive repairs, and more.

Color: Black

The Self Fusing Silicone Tape comes in a sleek and professional black color, adding a touch of style to any application. The black color also helps to blend in seamlessly with most surfaces, providing a discreet and clean finish.

Material: Self Fusing Silicone

Made from high-quality self fusing silicone material, this tape is highly durable and long-lasting. The non-tacky silicone material ensures that the tape does not stick to itself during application, making it easy to use and handle. This also allows for repositioning and adjustments, ensuring a perfect fit every time.

Applications and Scenarios

The Insulating Self Fusing Tape is suitable for a wide range of applications, including:

Electrical insulation for wires and cables

Pipe and hose repair and insulation

Automotive repairs and maintenance

Industrial equipment maintenance and protection

Home repairs and DIY projects

Whether you need to insulate electrical wires or repair a leaking hose, the Self Fusing Silicone Tape is the perfect solution. Its versatility and durability make it a must-have for any toolbox or emergency kit. Imagine being able to quickly and easily seal a leaky pipe or insulate a wire without the need for any tools or messy adhesives. With the Insulating Self Fusing Tape, you can do just that. Its non-tacky silicone material allows for easy application and repositioning, providing a hassle-free and efficient solution for all your insulation needs. Don't let subpar insulation compromise the safety and efficiency of your equipment and surroundings. Choose the Self Fusing Silicone Tape for maximum protection and peace of mind. Order yours today and experience the difference!

Customization:

Customized Service for Self Fusing Silicone Tape

Our Self Fusing Silicone Tape is made from high-quality Self Fusing Silicone material, ensuring its durability and effectiveness. With its UV resistant feature, it can withstand harsh outdoor conditions and maintain its performance. Designed to be heat-resistant, our Self Fusing Silicone Tape can withstand high temperatures without melting or losing its adhesive properties. Its high flexibility allows it to easily conform to any shape or surface, making it a versatile solution for various applications. We offer a customized service for our Self Fusing Silicone Tape, allowing you to choose the length that suits your specific needs. Whether you need it for a small repair or a larger project, we have you covered with our 10 feet length option. Our Self Fusing Silicone Tape is also self-sealing and non-tacky, making it easy to use and mess-free. It bonds to itself, creating a strong and tight seal that is resistant to water, oil, and chemicals. With our customized service, you can have the perfect Self Fusing Silicone Tape for your specific needs. Trust us to provide you with a high-quality product that offers exceptional performance and reliability.

Packing and Shipping:

Self Fusing Silicone Tape Packaging and Shipping

Our Self Fusing Silicone Tape is carefully packaged to ensure safe delivery to our customers. Each roll is individually wrapped in plastic and then placed in a sturdy cardboard box to prevent any damage during transit. The packaging is designed to be compact and easy to handle, making it convenient for both shipping and storage purposes. The box is also labeled with the product name and specifications for easy identification. For shipping, we offer various options to accommodate our customers' needs. We work with reliable shipping carriers to ensure timely delivery of our products. Customers can choose from standard ground shipping, expedited shipping, or international shipping. We also offer bulk packaging options for customers who require larger quantities of our Self Fusing Silicone Tape. The bulk packaging is designed to reduce waste and save on shipping costs. Rest assured, our team takes great care in packaging and shipping our products to ensure that they arrive at your doorstep in perfect condition. Thank you for choosing our Self Fusing Silicone Tape. We hope it serves you well.

FAQ:

Q: Is the Self Fusing Silicone Tape safe for use on electrical wires?

A: Yes, the Self Fusing Silicone Tape is electrically insulating and can be safely used on electrical wires to provide protection against moisture and damage.

Q: Can the Self Fusing Silicone Tape be used for emergency repairs?

A: Yes, the Self Fusing Silicone Tape is a popular choice for emergency repairs due to its strong and quick bonding capabilities. It is also highly durable, making it suitable for long-term solutions as well.

Q: What colors does the Self Fusing Silicone Tape come in?

A: The Self Fusing Silicone Tape is typically available in black and clear colors, providing a versatile option for different applications.

Q: Is the Self Fusing Silicone Tape waterproof?

A: Yes, the Self Fusing Silicone Tape is waterproof and can be used for sealing and repairing objects and surfaces that may come into contact with water.
