

Red Self Fusing Silicone Tape Waterproof Insulation Tape For Electrical Connector

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 500 rolls
- Supply Ability: 50000 Rolls per month

Product Specification

- Dielectric Strength: 20kv/mm
- Waterproof: Yes
- Color: Red
- Temperature Resistance: Up To 500°F
- Classification: Inorganic Insulation Material
- Flexibility: High
- Material: Self Fusing Silicone
- Adhesion Strength: High
- Highlight: **Red Self Fusing Silicone Tape, Electrical Connector Self Fusing Silicone Tape, Self Fusing Waterproof Insulation Tape**

Product Description:

Product Overview: Self Fusing Silicone Tape

The Self Fusing Silicone Tape is a revolutionary product that is designed to provide strong and reliable insulation for various electrical applications. This unique tape is made from high-quality self fusing silicone material, making it extremely durable and long-lasting. Its versatile nature allows it to bond and fuse together without any adhesive, making it a perfect solution for various repair and sealing needs.

- Product Attributes:
- No-Residue Self Fusing Tape
 - Waterproof Silicone Wrapping Tape
 - High Adhesion Strength
 - UV Resistant
 - Maximum Voltage 35kv
 - UV Resistant:

The Self Fusing Silicone Tape is designed to withstand harsh environmental conditions. Its UV resistant properties make it suitable for use in outdoor applications without the fear of it degrading due to exposure to sunlight. This makes it an ideal choice for both indoor and outdoor electrical projects.

High Adhesion Strength:

The Self Fusing Silicone Tape has a high adhesion strength, which means it can create a strong and tight bond when wrapped around an object. This makes it perfect for repairing and sealing various types of electrical connections, including wires, cables, and connectors. Its high adhesion strength also ensures that the tape stays in place and does not come off easily, providing long-lasting and reliable insulation.

Material: Self Fusing Silicone

The Self Fusing Silicone Tape is made from a high-quality self fusing silicone material. This material is known for its excellent insulating properties, making it perfect for electrical applications. It is also highly flexible and can conform to the shape of any surface, ensuring a tight and secure fit. Additionally, it is resistant to heat, chemicals, and moisture, making it a durable and reliable choice for any project.

Color: Black

The Self Fusing Silicone Tape is available in a sleek and professional black color. This color not only gives it a clean and neat appearance but also helps it blend in with most electrical components, making it a discreet yet effective solution for any repair or sealing needs.

Maximum Voltage: 35kv

The Self Fusing Silicone Tape is capable of withstanding a maximum voltage of 35kv, making it suitable for a wide range of electrical applications. It can provide insulation and protection for high-voltage connections, ensuring safety and reliability.

In conclusion, the Self Fusing Silicone Tape is a must-have product for any electrical project. Its no-residue self fusing design, high adhesion strength, UV resistance, and maximum voltage of 35kv make it a versatile and essential tool for any professional or DIY enthusiast. With its durable and reliable properties, this tape is sure to provide long-lasting and effective insulation for all your electrical needs.

Features:

- Product Name: Self Fusing Silicone Tape
- Width: 2 Inch
- Length: 10 Feet
- Waterproof: Yes
- Hs Code: 40082100
- Classification: Inorganic Insulation Material
- Non-Tacky Silicone Tape
- Stretchable Silicone Repair Tape
- High Temperature Resistance
- Insulating Properties

Technical Parameters:

Self Fusing Silicone Tape Technical Parameters

Parameter	Value
Product Name	No-Residue Self Fusing Tape
Width	2 Inch
UV Resistant	Yes
Classification	Inorganic Insulation Material
Maximum Voltage	35kv
Length	10 Feet

Material	Self Fusing Silicone
Adhesion Strength	High
Flexibility	High
Color	Red
Waterproof	Yes

Product Description

The Stretchable Silicone Repair Tape, also known as Self Sealing Silicone Tape or Electrical Insulation Tape, is a high-quality self fusing tape made of inorganic insulation material. It is designed to provide excellent adhesion strength and flexibility for various repair and insulation needs.

Applications:

Self Fusing Silicone Tape

Self Fusing Silicone Tape is a versatile and reliable repair tool that can be used in various applications. It is a stretchable silicone repair tape that is designed to provide a quick and easy solution for emergency repairs. This tape is made of high-quality silicone material and has exceptional properties that make it suitable for a wide range of applications.

Dielectric Strength: 400 V/mil

The dielectric strength of Self Fusing Silicone Tape is 400 volts per millimeter, making it an excellent choice for electrical insulation. This tape can withstand high voltage levels and provide reliable insulation for electrical components and wires. It is perfect for use in industrial and residential settings where electrical equipment and wiring require protection.

Temperature Resistance: Up To 500°F

Self Fusing Silicone Tape is heat resistant and can withstand temperatures up to 500°F. This makes it ideal for use in high-temperature environments where other tapes may fail. It can be used in applications such as engine repairs, exhaust systems, and other hot surfaces without losing its adhesion or strength.

Adhesion Strength: High

The adhesion strength of Self Fusing Silicone Tape is exceptionally high, making it perfect for various repair needs. It bonds quickly and firmly to most surfaces, including metal, plastic, rubber, and more. The strong adhesion ensures that the tape stays in place, providing a reliable and long-lasting repair solution.

HS Code: 40082100

Self Fusing Silicone Tape falls under the HS Code 40082100, which is the classification for self-adhesive plates, sheets, film, foil, tape, strip, of plastics. This code is used for international trade and customs purposes, making it easier to ship and receive this product from different countries.

Maximum Voltage: 35kv

With a maximum voltage of 35kv, Self Fusing Silicone Tape can provide reliable insulation and protection for high voltage applications. It is commonly used in the electrical industry, including power plants, transformers, and other high voltage equipment. This tape is also perfect for DIY enthusiasts who need a safe and effective solution for electrical repairs.

Applications and Scenarios

Self Fusing Silicone Tape is an essential tool to have in any repair kit, whether at home or in a professional setting. Here are some of the common applications and scenarios where this tape can be used:

Electrical Repairs: As mentioned earlier, this tape is an excellent electrical insulation tape and can be used for repairs on wires, cables, and other electrical components. It can provide a quick fix for damaged insulation or act as an extra layer of protection for exposed wires.

Plumbing Repairs: The waterproof and heat resistant properties of Self Fusing Silicone Tape make it an ideal solution for plumbing repairs. It can be used to seal leaks, fix broken pipes, and even temporary repairs on hot water pipes.

Automotive Repairs: This tape is perfect for emergency repairs on vehicles, including fixing leaks in hoses, sealing exhaust pipes, and repairing damaged wires. It can withstand high temperatures and can be used in various parts of the engine or exhaust system.

Outdoor and Camping: Self Fusing Silicone Tape can also come in handy during outdoor activities and camping trips. It can be used to repair camping gear, tents, and even temporarily fix broken equipment.

Emergency Repairs: This tape is a reliable and versatile emergency repair tool that can be used in various scenarios. Whether it's a leaky pipe, a broken wire, or a damaged hose, Self Fusing Silicone Tape can provide a quick and easy solution to keep things running until a permanent fix can be made.

In conclusion, Self Fusing Silicone Tape is a must-have product for anyone who needs a reliable and versatile repair tool. Its exceptional properties, including high adhesion strength, temperature resistance, and high dielectric strength, make it suitable for various applications. With its no-residue self-fusing design, this tape is easy to use and leaves no mess behind. Whether it's for electrical, plumbing, automotive, or emergency repairs, this tape is an essential item to have in any toolkit.

Customization:

Customized Services for Self Fusing Silicone Tape

Product Attributes:

HS Code: 40082100

Length: 10 Feet

Material: Self Fusing Silicone

Color: Red

Waterproof: Yes

Key Features:

Non-Tacky Silicone Tape

Heat Resistant Silicone Tape

Self Bonding Silicone Tape

Easy to Use

Durable

Versatile

Our Self Fusing Silicone Tape is designed to meet your specific needs and requirements. With our customized services, you can personalize the tape to suit your unique applications. Whether you need a longer length or a different color, we can provide you with a tailored solution.

Customization Options:

Length: We can provide lengths longer than 10 feet to meet your specific needs.

Color: In addition to black, we offer a variety of colors to match your preferences.

Logo Printing: We can print your company logo or any other design on the tape for branding purposes.

Packaging: We offer customized packaging options, such as labeling and shrink wrapping, to meet your packaging requirements.

Our Self Fusing Silicone Tape is perfect for various applications due to its non-tacky, self bonding, and heat resistant properties. With our customization options, you can ensure that the tape is specifically tailored to your needs for optimal performance.

Order now and let us help you create the perfect Self Fusing Silicone Tape for your unique needs!

Packing and Shipping:

Self Fusing Silicone Tape Packaging and Shipping

Our Self Fusing Silicone Tape comes in a durable and convenient packaging, perfect for shipping and storage. The packaging is designed to protect the tape from any damage during transportation and ensure its quality upon arrival.

Packaging Details:

Size: Available in various sizes to meet your needs

Thickness: 0.5mm or customized

Color: Black, red, blue, yellow, or customized

Material: High-quality silicone

Quantity: 1 roll per package

Shipping Details:

Delivery Method: By air, sea, or land

Delivery Time: 3-5 business days for air, 15-30 days for sea

Shipping Port: Shanghai, Ningbo, or customized

Packaging: Packed in sturdy cartons to ensure safe transportation

For customized packaging and shipping options, please contact us for further assistance.
