

Yellow Colour Water-proof Insulation Self -fusing Silicone Tape for Electrical Connector

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 500 rolls
- Supply Ability: 50000 Rolls per month

Product Specification

- Material: Self Fusing Silicone
- Temperature Resistance: Up To 500°F
- Adhesion Strength: High
- Flexibility: High
- Uv Resistant: Yes
- Width: 2 Inch
- Hs Code: 40082100
- Classification: Inorganic Insulation Material
- Flame Retardant: Yes
- Highlight: **yellow self fusing silicone tape, yellow self fusing waterproof tape, insulation self fusing silicone tape**

Product Description

Product Description:

Self Fusing Silicone Tape

Our Self Fusing Silicone Tape is a versatile and reliable solution for all your electrical and repair needs. Made from high quality self fusing silicone material, this tape is designed to provide a strong and durable bond without leaving any residue behind. It is a must-have item for every toolbox, providing a quick and easy fix for various emergency situations.

Product Attributes

Dielectric Strength: 20kv/mm

Color: Yellow

Material: Self Fusing Silicone

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Flexibility: High

Product Features

Our Self Fusing Silicone Tape stands out from other tapes in the market with its unique features:

No-Residue Self Fusing Tape: Unlike traditional tapes, our Self Fusing Silicone Tape does not leave any sticky residue behind. This makes it easy to remove and reapply without any mess.

Self Bonding Silicone Tape: The silicone material of our tape creates a strong and reliable bond with itself, providing a tight seal that can withstand extreme temperatures and harsh environments.

Non-Tacky Silicone Tape: Our tape is designed to be non-tacky, meaning it will not stick to your hands or other surfaces until it is stretched and applied, making it easy to handle and use.

Water-tight Seal: The self fusing properties of our tape create a water-tight seal, making it perfect for use in wet or damp environments, such as plumbing repairs or outdoor electrical work.

Applications

Our Self Fusing Silicone Tape has a wide range of applications, including but not limited to:

Electrical Insulation: Our tape provides an excellent insulating barrier for electrical wires, protecting them from moisture and other damaging elements.

Pipe Repair: The strong and water-tight seal of our tape makes it ideal for repairing leaks or breaks in pipes, providing a temporary fix until a permanent solution can be implemented.

Emergency Hose Repair: Whether it's a garden hose, a car radiator hose, or a hydraulic hose, our tape can provide a quick and reliable fix to get you back up and running in no time.

Get your hands on our Self Fusing Silicone Tape today and experience its amazing features and applications. Keep it in your toolbox or emergency kit for those unexpected situations that require a quick and reliable fix. Don't let a simple repair job turn into a costly and time-consuming task. With our tape, you can fix it in no time and get back to your day.

Features:

Product Name: Self Fusing Silicone Tape

Uv Resistant: Yes

Color: Yellow

Flexibility: High

Feature: Heat-Resistant

Length: 10 Feet

Non-Tacky Silicone Tape

Self Sealing Silicone Tape

Waterproof

Insulating

Durable

Technical Parameters:

Technical Parameters for Self Fusing Silicone Tape

Attribute	Value
Product Name	Self Fusing Silicone Tape
Color	Yellow
Adhesion Strength	High
Feature	Heat-Resistant
HS Code	40082100
Maximum Voltage	35kv
Width	2 Inch

UV Resistant	Yes
Classification	Inorganic Insulation Material
Application	Electrical Insulation, Pipe Repair, Emergency Hose Repair, etc.
Flexibility	High
Additional Features	Self Sealing Silicone Tape, Self Amalgamating Silicone Tape, No-Residue Self Fusing Tape

Applications:

Self Fusing Silicone Tape - The Ultimate Solution for Repairs

Self Fusing Silicone Tape is a revolutionary product that has gained immense popularity in recent years. It is a versatile and easy-to-use product that is designed to provide quick and effective solutions for various repair needs. With its unique self-fusing properties, this tape has become a go-to product for many industries and individuals alike.

Maximum Voltage: 35kv

One of the key features of Self Fusing Silicone Tape is its high maximum voltage of 35kv. This makes it an ideal choice for electrical insulation and repairs. It can withstand high voltage levels and provide a secure and reliable seal, making it a must-have product for any electrical work.

Length: 10 Feet

Each roll of Self Fusing Silicone Tape comes in a length of 10 feet, providing enough material for multiple repairs. This makes it a cost-effective solution as you can use the tape for different applications without having to purchase multiple rolls. The length also makes it convenient to carry around and store.

UV Resistant: Yes

Self Fusing Silicone Tape is designed to withstand harsh outdoor conditions, including exposure to UV rays. Its UV resistant property makes it suitable for use in both indoor and outdoor settings, making it a versatile product for various repair needs.

Width: 1 Inch

The width of Self Fusing Silicone Tape is 1 inch, making it suitable for a wide range of applications. It can be easily wrapped around pipes, wires, and other objects of different sizes, providing a tight and secure seal. The width also makes it easy to handle and apply, even for those with limited experience in repairs.

No-Residue Self Fusing Tape

One of the most impressive features of Self Fusing Silicone Tape is its ability to bond to itself without leaving any residue. This makes it easy to remove and reapply if needed, without causing any damage to the surface or the tape itself. It also ensures a clean and neat finish, making it a preferred choice for many professionals.

Self Bonding Silicone Tape

Self Fusing Silicone Tape is designed to bond to itself, creating a strong and durable seal. This eliminates the need for any additional adhesives, making it a mess-free and hassle-free solution for repairs. The self-bonding property also makes it suitable for use in various environments, including underwater and high-temperature settings.

Self Sealing Silicone Tape

Another important feature of Self Fusing Silicone Tape is its self-sealing property. This means that it creates an airtight and watertight seal, making it an ideal choice for emergency hose repairs. It can also be used for pipe repairs, providing a quick and easy solution for leaks. This makes it a must-have product for any household, workshop, or industrial setting.

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Self Fusing Silicone Tape is a versatile product that can be used for a wide range of applications. Its high maximum voltage makes it suitable for electrical insulation and repairs, while its self-sealing property makes it ideal for pipe and hose repairs. It can also be used for sealing leaks and cracks in various objects, making it a handy product to have in any repair kit.

With its unique properties and wide range of applications, Self Fusing Silicone Tape has become a must-have product for any repair needs. Its ease of use, durability, and effectiveness have made it a popular choice among professionals and DIY enthusiasts alike. Get your hands on this amazing product today and experience the convenience and efficiency it offers!

Customization:

Customization Service for Self Fusing Silicone Tape

Our Self Fusing Silicone Tape is a versatile and high-quality product that offers excellent flexibility and adhesion strength. With a dielectric strength of 400 V/mil, it is perfect for various applications such as electrical insulation, pipe repair, emergency hose repair, and more. With a maximum voltage rating of 35kv, it is a reliable and durable solution for your needs.

Our Non-Tacky Silicone Tape is specially designed to provide a mess-free and easy-to-use experience. It does not leave any residue or stickiness, making it convenient to use in any situation. The Self Amalgamating Silicone Tape creates a strong bond with itself, resulting in a tight and secure seal for your application.

Our Heat Resistant Silicone Tape is capable of withstanding high temperatures, making it suitable for use in hot environments. It is highly durable and can withstand extreme conditions, ensuring long-lasting performance.

With our customization service, we strive to meet your unique needs and requirements. Whether you need a specific color, width, or length, we can tailor our Self Fusing Silicone Tape to meet your specifications. We also offer custom packaging options to suit your branding and labeling needs.

Choose our Self Fusing Silicone Tape for its exceptional flexibility, high adhesion strength, and impressive dielectric strength. Our non-tacky, self amalgamating, and heat resistant features make it a reliable and versatile solution for a wide range of applications. With our customization service, we ensure that our product meets your exact needs and exceeds your expectations.

Packing and Shipping:

Packaging and Shipping for Self Fusing Silicone Tape

Our Self Fusing Silicone Tape is carefully packaged to ensure safe delivery to our customers. Each roll of tape is wrapped in a protective plastic film to prevent any damage during shipping.

The tape is then placed in a sturdy cardboard box, along with any necessary instructions or product information. The box is sealed to keep out any moisture or dirt that could potentially damage the tape.

For international shipments, the box is labeled with the product name, quantity, and weight. Customs declarations are also included to comply with international shipping regulations.

Once the package is ready, it is shipped using reliable carriers to ensure timely delivery. Customers can choose from various shipping options at checkout, including express shipping for urgent orders.

Upon arrival, customers should inspect the package for any signs of damage. If there are any issues, please contact us immediately for assistance.

We strive to provide the best packaging and shipping services to ensure our customers receive their Self Fusing Silicone Tape in perfect condition.

FAQ:

Q: How does Self Fusing Silicone Tape work?

A: Self Fusing Silicone Tape is made of a special silicone material that fuses to itself when stretched and wrapped around an object. This creates a tight and permanent bond that is resistant to water, weather, and other environmental factors. It can also be easily removed and repositioned if needed.

Q: Can Self Fusing Silicone Tape be used on any surface?

A: Yes, Self Fusing Silicone Tape is suitable for use on a variety of surfaces, including metal, plastic, rubber, and more. It adheres well to both smooth and rough surfaces, making it a versatile option for all kinds of repairs.

Q: Is Self Fusing Silicone Tape heat resistant?

A: Yes, Self Fusing Silicone Tape can withstand high temperatures up to 500°F (260°C) without losing its bond or integrity. This makes it suitable for use in hot environments or for repairs on objects that experience heat exposure.

Q: What colors does Self Fusing Silicone Tape come in?

A: Self Fusing Silicone Tape is available in a variety of colors, including black, red, blue, and clear. This allows for color-coding and customization for different repair projects.

Q: Is Self Fusing Silicone Tape waterproof?

A: Yes, Self Fusing Silicone Tape is completely waterproof and can be used for both indoor and outdoor repairs. It is also resistant to chemicals, oils, and other fluids, making it a reliable solution for a wide range of applications.
