

Green Waterproof Insulation Self Fusing Silicone Tape For Electrical Connector

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 500 rolls
- Supply Ability: 50000 Rolls per month

Product Specification

- Uv Resistant: Yes
- Flexibility: High
- Length: 5M
- Adhesion Strength: High
- Temperature Resistance: Up To 500°F
- Width: 5CM
- Maximum Voltage: 35kv
- Hs Code: 40082100
- Water-proof: Yes
- Highlight: **Green Self Fusing Silicone Tape ,
Insulation Self Fusing Silicone Tape ,
Waterproof Self Fusing Insulation Tape**

Product Description

Product Description:

Self Fusing Silicone Tape

Product Overview

Self Fusing Silicone Tape is a high-quality, multi-purpose repair tape designed to provide a strong and durable bond in various applications. Made from a unique silicone material, this tape is perfect for electrical insulation, pipe repair, emergency hose repair, and more.

Key Features

Self Bonding: The tape fuses to itself, creating a strong and permanent bond without the need for adhesive.

Non-Tacky: The silicone material is non-tacky, making it easy to handle and apply without leaving any residue.

Stretchable: The tape has high flexibility and can stretch to conform to any shape, making it perfect for various repair applications.

Multi-Purpose: This tape is suitable for a wide range of uses, including electrical insulation, pipe repair, emergency hose repair, and more.

Product Details

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Color:Green

Flexibility: High

Temperature Resistance: Up To 500°F

Width: 5cm

Features:

Product Name: Self Fusing Silicone Tape

Length: 5m

Material: Self Fusing Silicone

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Feature: Heat-Resistant

Maximum Voltage: 35kv

Self Sealing Silicone Tape

No-Residue Self Fusing Tape

Self Adhesive Silicone Tape

Technical Parameters:

Parameter	Value
Maximum Voltage	35kv
Length	5m
Dielectric Strength	400 V/mil
Classification	Inorganic Insulation Material
Feature	Heat-Resistant, Self Adhesive
Flexibility	High
Hs Code	40082100
Adhesion Strength	High
Material	Self Fusing Silicone
Waterproof	Yes

Applications:

Self Fusing Silicone Tape

Product Description

Self Fusing Silicone Tape is a high-quality, self-amalgamating tape that is perfect for various applications. It is designed to fuse together upon contact, creating a strong and reliable bond that is perfect for both indoor and outdoor use.

Color and Length

This tape is available in a sleek and professional green color, making it suitable for any type of project. It comes in a length of 5m, providing enough tape for multiple uses.

Maximum Voltage

Self Fusing Silicone Tape has a maximum voltage of 35kv, making it suitable for high-voltage applications. It can withstand extreme electrical current and prevent any potential accidents or damages.

Feature: Heat-Resistant

One of the key features of Self Fusing Silicone Tape is its ability to withstand high temperatures. It has a heat-resistant feature, making it perfect for use in hot environments or for applications that involve heat.

Adhesion Strength

This tape has a high adhesion strength, ensuring that it stays in place once applied. It forms a strong and durable bond that can withstand tension, pressure, and vibrations, making it perfect for a wide range of applications.

Application Scenarios

Self Fusing Silicone Tape is the perfect solution for a variety of scenarios. Its no-residue self fusing feature makes it ideal for repairing and sealing leaks in pipes, hoses, and electrical wires. Its insulating self fusing feature makes it suitable for use in electrical and plumbing applications. And its waterproof silicone wrapping feature makes it perfect for outdoor use, such as repairing and protecting outdoor equipment, tools, and cables.

Whether you are a DIY enthusiast or a professional in the construction, plumbing, or electrical industry, Self Fusing Silicone Tape is a must-have product in your toolkit. Its versatility, durability, and high-quality performance make it a reliable solution for all your sealing and bonding needs.

Customization:

Customized Service for Self Fusing Silicone Tape

Application:

This Non-Tacky Silicone Tape is perfect for a variety of applications, including Electrical Insulation, Pipe Repair, Emergency Hose Repair, and more. It can be used in a wide range of industries, making it a versatile and valuable product to have on hand.

Flexibility:

Our Stretchable Silicone Repair Tape offers a high level of flexibility, allowing it to conform to any shape or surface. This makes it ideal for use on irregular or curved surfaces, providing a strong and secure bond that can withstand even the most demanding conditions.

Color:

The standard color for our Silicone Wrapping Tape is green, providing a sleek and professional look for any repair or insulation job. This color also helps to blend in with most surfaces and is suitable for use in a variety of settings.

Classification:

Our Self Fusing Silicone Tape is classified as an Inorganic Insulation Material, ensuring its durability and longevity. This classification means that it can withstand high temperatures and harsh environments, providing reliable protection and repair for your equipment.

Feature:

One of the key features of our Self Fusing Silicone Tape is its heat-resistant properties. This makes it an ideal choice for use in applications where high temperatures may be a concern. It can withstand extreme heat without melting or losing its adhesive properties, ensuring a strong and secure bond.

We also offer a Waterproof Silicone Wrapping Tape option, providing added protection in wet or damp environments. This feature makes our tape suitable for use in outdoor or underwater settings, making it a versatile and reliable choice for all your repair and insulation needs.

Non-Tacky Silicone Tape

Stretchable Silicone Repair Tape

Waterproof Silicone Wrapping Tape

Packing and Shipping:

Package and Shipping for Self Fusing Silicone Tape

The Self Fusing Silicone Tape is carefully packaged to ensure its quality and protection during shipping. The packaging includes: Individual rolls of tape are first wrapped in a protective layer of plastic to prevent any damage or contamination.

All rolls are then placed in a sturdy cardboard box to provide additional protection during transit.

The box is sealed with tape to ensure the contents stay secure.

Each box is labeled with the product name, quantity, and any important handling instructions.

We offer a variety of shipping options to meet your needs:

Standard Shipping: Our default shipping method is standard ground shipping, which typically takes 3-5 business days for delivery.

Expedited Shipping: For urgent orders, we offer expedited shipping options such as overnight or 2-day delivery for an additional fee.

International Shipping: We ship worldwide and offer various international shipping options based on your location.

Once your order is processed and shipped, you will receive a tracking number via email to track your package's delivery status. We take great care in ensuring your Self Fusing Silicone Tape arrives safely and on time.
