

Grey Colour Water-proof Insulation Self-fusing Silicone Tape for Electrical Connector

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 500 rolls
- Supply Ability: 50000 Rolls per month

Product Specification

- Feature: Heat-Resistant
- Hs Code: 40082100
- Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.
- Width: 2Inch
- Length: 10 Feet
- Dielectric Strength: 400 V/mil
- Color: Grey
- Waterproof: Yes
- Highlight: **insulation self fusing silicone tape,
insulation self fusing waterproof tape,
silicone self fusing waterproof tape**

Product Description

Product Description:

Self Fusing Silicone Tape

Self Fusing Silicone Tape is a versatile and innovative product that offers strong and reliable insulation for various electrical applications. Made from high-quality self fusing silicone, this tape is designed to bond to itself, creating a tight, waterproof and long-lasting seal.

Product Overview

Self Fusing Silicone Tape is an inorganic insulation material with a dielectric strength of 400 V/mil, making it ideal for use in a wide range of electrical applications. It is a perfect solution for sealing and insulating wires, cables, pipes, and other electrical components.

Key Features

Self Bonding: The tape is designed to bond to itself, creating a strong and reliable seal without the need for any external adhesive.

Waterproof: The self fusing silicone material used in the tape makes it completely waterproof, ensuring long-lasting protection against moisture and other environmental factors.

Maximum Voltage: With a maximum voltage of 35kv, this tape offers excellent insulation for high voltage applications.

Versatile: Self Fusing Silicone Tape can be used for a wide range of applications, including electrical, plumbing, automotive, and more.

Durable: Made from high-quality silicone, this tape is highly resistant to heat, UV rays, and other harsh weather conditions, ensuring long-lasting durability.

How to Use

Using Self Fusing Silicone Tape is easy and straightforward. Simply wrap the tape around the desired object, stretching it slightly as you go to activate the self bonding feature. The tape will bond to itself, creating a tight and waterproof seal. For best results, ensure that the surface is clean and free from any dirt or moisture before applying the tape.

Conclusion

Self Fusing Silicone Tape is a reliable and cost-effective solution for all your insulation needs. Its unique self bonding feature, waterproof nature, and high dielectric strength make it a must-have for any electrical project. Invest in this versatile and durable tape today and experience the convenience and efficiency it has to offer.

Features:

Product Name: Self Fusing Silicone Tape

Adhesion Strength: High

Feature: Heat-Resistant

Width: 2 Inch

Hs Code: 40082100

Uv Resistant: Yes

Waterproof Silicone Wrapping Tape

Self Amalgamating Silicone Tape

Self Bonding Tape

Self-Fusing Silicone Rubber Tape

Technical Parameters:

Feature	Heat-Resistant
Adhesion Strength	High
Application	Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.
Flexibility	High
Dielectric Strength	20 KV/MM
Maximum Voltage	35kv
Width	2Inch
Color	Grey
Hs Code	40082100
Length	10 Feet
Product Name	Self Bonding Silicone Tape
Self Adhesive Silicone Tape	Heat-Resistant
Hs Code	40082100
Width	2 Inch
Length	10 Feet

Color	Grey
Maximum Voltage	35kv
Dielectric Strength	20Kv/MM
Adhesion Strength	High
Flexibility	High
Application	Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Applications:

Self Fusing Silicone Tape

Self Fusing Silicone Tape is a versatile and innovative product that is designed to provide a strong and reliable solution for a wide range of applications. Made from high-quality self fusing silicone material, this tape offers exceptional performance and durability, making it a must-have tool for any toolbox.

Material

The Self Fusing Silicone Tape is made from premium quality self fusing silicone, which is a unique material that has the ability to bond to itself without any adhesive. This feature makes the tape easy to use and eliminates the need for messy and time-consuming adhesives.

Dielectric Strength

One of the key attributes of Self Fusing Silicone Tape is its high dielectric strength of 400 V/mil. This makes it an ideal choice for electrical insulation applications, providing a reliable and secure seal to protect against moisture, corrosion, and other environmental factors.

Features

The Self Fusing Silicone Tape is known for its exceptional heat-resistant properties, making it a perfect solution for high-temperature applications. It can withstand temperatures up to 260°C, making it suitable for a variety of industrial and commercial uses. Additionally, the tape is also waterproof, ensuring a strong and reliable seal even in wet and humid conditions.

HS Code

The HS Code for Self Fusing Silicone Tape is 40082100, which is a universal code used to classify this product for international trade purposes.

Applications

Self Fusing Silicone Tape has a wide range of applications, making it a must-have tool for any household, workshop, or industrial setting. Some of its common uses include:

Electrical Insulation: The tape is widely used for electrical insulation, providing a reliable and durable seal for electrical connections, wires, and cables.

Pipe Repair: The flexible nature of the tape makes it perfect for repairing leaks and cracks in pipes, providing a watertight seal that can withstand high-pressure environments.

Emergency Hose Repair: In case of a sudden hose or pipe break, Self Fusing Silicone Tape can be used as a temporary fix to stop the leakage and prevent further damage.

Other Uses: The tape can also be used for sealing and repairing air ducts, hoses, and other industrial equipment, making it a versatile solution for various maintenance and repair needs.

Keywords

To sum it up, Self Fusing Silicone Tape is a waterproof silicone wrapping tape that can be self-sealed and self-bonded, making it incredibly easy to use. With its high temperature resistance, durability, and flexibility, this tape is an essential tool for any situation that requires a strong and reliable seal.

Customization:

Self Fusing Silicone Tape - Customized Service

Our Self Fusing Silicone Tape is designed to provide superior protection and versatility for all your sealing and wrapping needs. With our customized service, you can now get your very own Self Fusing Silicone Tape with the following specifications:

Width: 2 Inch

Length: 10 Feet

Color: Grey

Flexibility: High

Material: Self Fusing Silicone

Our Waterproof Silicone Wrapping Tape is perfect for sealing and protecting electrical connections, pipes, and hoses. It is also ideal for use in automotive, plumbing, and construction projects. With its high flexibility, it can easily conform to any shape or surface, providing a tight and secure wrap every time.

Not only is our Self Fusing Silicone Tape waterproof, but it is also heat resistant, making it suitable for use in extreme temperatures. It can withstand temperatures up to 500°F, making it a reliable choice for various applications.

One of the most unique features of our Self Fusing Silicone Tape is its self amalgamating properties. This means that when stretched and wrapped around an object, the tape fuses to itself, creating a strong and durable bond. This makes it perfect for emergency repairs and quick fixes.

Don't settle for generic tape when you can have a customized Self Fusing Silicone Tape that meets your specific needs. Contact us now and take advantage of our top-notch customized service. Get your own personalized Self Fusing Silicone Tape today!

Packing and Shipping:

Self Fusing Silicone Tape Packaging and Shipping

Our Self Fusing Silicone Tape is carefully packaged to ensure safe and secure delivery to your doorstep. Each roll is individually sealed and placed in a sturdy box to prevent any damage during transportation.

Packaging Details

Roll size: 2 Inch x 10 Feet

Each roll is sealed with PP bag

Packaging material: Cardboard box

Shipping Information

We offer worldwide shipping for our Self Fusing Silicone Tape. Our standard shipping method is through international air mail, with an estimated delivery time of 7-14 business days.

For urgent orders, we also offer express shipping options such as DHL, FedEx, and UPS. Please contact us for more information and pricing.

Once your order has been shipped, we will provide you with a tracking number so you can track the status of your delivery.

If you have any questions or concerns about your shipment, please don't hesitate to contact us. We are committed to providing the best customer service and ensuring your satisfaction with our product.

FAQ:

Q: What makes Self Fusing Silicone Tape different from regular adhesive tape?

A: Unlike regular adhesive tape, Self Fusing Silicone Tape does not require any additional adhesive to bond to surfaces. It fuses to itself when stretched and wrapped around an object, creating a strong and permanent hold.

Q: Can Self Fusing Silicone Tape be used for electrical repairs?

A: Yes, Self Fusing Silicone Tape is often used for electrical repairs as it is non-conductive and can withstand high temperatures.

Q: Is Self Fusing Silicone Tape waterproof?

A: Yes, Self Fusing Silicone Tape is waterproof and can be used for both indoor and outdoor applications.

Q: How long does Self Fusing Silicone Tape take to cure?

A: Self Fusing Silicone Tape does not require curing time. It bonds instantly when stretched and wrapped around an object.

Q: Can Self Fusing Silicone Tape be removed easily?

A: Yes, Self Fusing Silicone Tape can be removed easily without leaving any residue behind. However, it is recommended to cut it off rather than trying to peel it off.
