

Grey Colour Water-proof Insulation Self -fusing Silicone Tape for Cable Breakage Repair

Basic Information

Quantity:

Place of Origin: China
Brand Name: zhonglei
Model Number: zl6030si
Minimum Order 500 rolls

• Supply Ability: 50000 Rolls per month

Product Specification

Material: Self Fusing Silicone

Classification: Inorganic Insulation Material

Flexibility: HighMaximum Voltage: 35kv

Application: Electrical Insulation, Pipe Repair, Emergency

Hose Repair, Etc.

• Temperature Up To 500°F

Resistance:

Waterproof: YesLength: 10 Feet

• Highlight: insulation self fusing silicone tape,

insulation self fusing waterproof tape, silicone self fusing waterproof tape

Product Description:

Self Fusing Silicone Tape - Product Overview

Self Fusing Silicone Tape is a high quality, self adhesive tape that is perfect for various applications. This versatile tape is designed to bond to itself, creating a strong and durable seal that is resistant to high temperatures and other harsh conditions. With a length of 10 feet and a width of 1 inch, this tape is perfect for a wide range of projects and repairs.

Product Name	Self Fusing Silicone Tape
Length	10 Feet
Width	1 Inch
Temperature Resistance	Up to 500°F
Flexibility	High
Maximum Voltage	35kv

One of the key benefits of Self Fusing Silicone Tape is its high temperature resistance. This tape can withstand temperatures of up to 500°F, making it ideal for use in hot environments or for repairs on high temperature equipment. It is also waterproof and insulating, providing an extra layer of protection for your projects.

The self adhesive nature of this tape makes it easy to use and eliminates the need for messy glues or adhesives. Simply wrap the tape around the object or surface you want to seal, and the silicone material will bond to itself, creating a strong and permanent seal. This makes it perfect for emergency repairs, as well as for regular maintenance and DIY projects.

Another great feature of Self Fusing Silicone Tape is its versatility. It can be used for various applications, such as sealing leaks, repairing cables and pipes, and even creating a non-slip grip on tools and handles. Its high flexibility also allows it to conform to any shape or surface, making it suitable for both flat and irregular surfaces.

Key Features: Self Amalgamating Tape

Applications:

Self Fusing Silicone Tape: The Ultimate Solution for All Your Repair Needs

Are you tired of using messy and unreliable tapes for your repair work? Look no further, because the Self Fusing Silicone Tape is here to save the day! This innovative product is a must-have for every household, workshop, and industrial setting. Let's explore the various applications and scenarios where this incredible tape can be used.

Hs Code: 40082100

The Self Fusing Silicone Tape falls under the category of inorganic insulation materials and is classified under HS code 40082100. This code is used to identify the product for international trade and customs purposes, making it easier for you to purchase and transport this versatile tape to any part of the world.

Application: Electrical Insulation

The Self Fusing Silicone Tape is highly effective in providing electrical insulation. Its unique self-fusing property allows it to create an airtight and waterproof seal, protecting the wires and cables from moisture, corrosion, and other environmental factors. The tape is also resistant to high temperatures up to 500°F, making it suitable for use in electrical applications where heat resistance is crucial. Pipe Repair

The Self Fusing Silicone Tape is the go-to product for repairing leaky or damaged pipes. Its self-fusing property allows it to bond to itself, creating a strong and durable seal that can withstand high water pressure. This tape is also resistant to chemicals, making it ideal for use in industrial settings where pipes are exposed to harsh substances.

Emergency Hose Repair

When a hose bursts or develops a leak, it can lead to a messy and chaotic situation. But with the Self Fusing Silicone Tape, you can quickly fix the hose and prevent any further damage. Its no-residue adhesive leaves no sticky residue behind, ensuring a clean and hassle-free repair. This tape is also flexible and can be used on various types of hoses, including garden hoses, irrigation hoses, and more.

High-Temperature Tape

The Self Fusing Silicone Tape is specially designed to withstand high temperatures up to 500°F, making it an excellent choice for use in extreme temperature environments. It can be used for insulation and sealing in industrial settings, automotive repairs, or even for DIY projects that require a heat-resistant tape.

Self-Sealing Tape

One of the most significant advantages of the Self Fusing Silicone Tape is its self-sealing property. This means that the tape fuses to itself when wrapped around an object, creating a strong and permanent bond. Unlike traditional tapes that require external pressure or heat to seal, this tape only needs to be stretched and wrapped around the object to create a tight and secure seal.

With its versatile applications and reliable performance, the Self Fusing Silicone Tape is truly a game-changer in the world of repair tapes. Its no-residue adhesive, high-temperature resistance, and self-fusing property make it a must-have product for every home, workshop, and industrial setting. So why wait? Get your hands on this amazing tape today and experience its incredible benefits for yourself!

Customization:

Customization Service for Self Fusing Silicone Tape

Our Self Fusing Silicone Tape is a high-quality product that offers maximum voltage protection up to 35kv. Designed to withstand extreme temperatures up to 500°F, this tape is perfect for a variety of industrial and household applications.

With a width of 1 inch and a strong adhesion strength, our Self Fusing Silicone Tape is perfect for all your sealing and insulation needs. It comes in a sleek black color, adding a professional touch to your projects.

Product Attributes:

No-Residue Self Fusing Tape Self Amalgamating Silicone Tape Self Sealing Silicone Tape Maximum Voltage: 35kv

Temperature Resistance: Up To 500°F

Width: 1 Inch Color: Grey

Adhesion Strength: High

Choose our Self Fusing Silicone Tape for a reliable and durable solution for all your electrical and sealing needs. Contact us now to learn more about our customization options and how we can tailor our product to meet your specific requirements.

Packing and Shipping:

Packaging and Shipping

Packaging

The Self Fusing Silicone Tape is packaged in a sturdy and durable plastic container to ensure safe transportation and storage. The container is designed to protect the tape from any damage or external elements, such as moisture and dust.

The tape is rolled up neatly and securely inside the container, with the product information and instructions printed on the outside for easy reference.

Each container contains one roll of Self Fusing Silicone Tape, with the length of the tape varying based on the customer's choice of size. Shipping

Our company offers worldwide shipping for the Self Fusing Silicone Tape. We work with trusted shipping partners to ensure timely and secure delivery of our products to our customers.

The tape is carefully packed and sealed in a protective envelope or box, depending on the size and quantity of the order. This ensures that the product remains intact and undamaged during transportation.

Customers can choose from a variety of shipping options, including standard shipping, express shipping, and expedited shipping. The shipping cost will be calculated based on the destination and the chosen shipping method.

Once the order has been shipped, customers will receive a tracking number to monitor the delivery status of their package. Our team is always available to assist with any shipping inquiries or concerns.

For bulk orders, we offer customized packaging and shipping solutions to meet the specific needs and requirements of our customers.

FAQ:

Q:What is Self Fusing Silicone Tape?

A:Self Fusing Silicone Tape is a unique type of tape that fuses to itself, creating a strong and durable bond without the need for adhesive. Q:What makes Self Fusing Silicone Tape different from other tapes?

A:Self Fusing Silicone Tape is unique in that it does not require any adhesive to bond to itself or other surfaces. It also has excellent resistance to extreme temperatures, moisture, and chemicals.

Q:How does Self Fusing Silicone Tape work?

A:Self Fusing Silicone Tape works by stretching and wrapping around a surface. As it is wrapped, the silicone material fuses with itself, creating a strong and permanent seal.

Q:What materials can Self Fusing Silicone Tape adhere to?

A:Self Fusing Silicone Tape can adhere to a wide variety of materials, including metal, plastic, rubber, glass, and more.

Q:Can Self Fusing Silicone Tape be removed and reused?

A:Yes, Self Fusing Silicone Tape can be easily removed and reused without leaving any residue behind.
