

## Yellow Anti Slip Waterproof Self Fusing Silicone Tape 25MM For Fishing Rod Handle

### Our Product Introduction

more products please visit us on [siliconerubber-product.com](http://siliconerubber-product.com)

#### Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 1000 rolls
- Supply Ability: 50000 Rolls per month

#### Product Specification

- Dielectric Strength: 400 V/mil
- Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.
- Temperature Resistance: Up To 500°F
- Feature: Heat-Resistant
- Hs Code: 40082100
- Maximum Voltage: 35kv
- Color: Yellow
- Material: Self Fusing Silicone
- Elongation At Break: >350
- Highlight: **Self Fusing Silicone Tape ,  
Anti Slip Self Fusing Silicone Tape ,  
Self Fusing Waterproof Silicone Tape**

## Product Description

### Product Description:

The Self Fusing Silicone Tape, an innovative and versatile tool, is designed to provide a reliable and long-lasting seal for a variety of applications. Made from premium self-fusing silicone, this tape is engineered to create a cohesive bond without the need for adhesives, making it an ideal solution for both professional and DIY repairs. Its unique material composition ensures that it adheres firmly to itself, forming a solid, rubber-like seal that is resistant to water, air, and moisture, thereby maintaining the integrity of the bond even in challenging environmental conditions.

This high-quality Stretchable Silicone Repair Tape is not only practical but also aesthetically pleasing, coming in a sleek black color. The color adds a professional touch to the repair work, making it less obtrusive and more acceptable in visible areas. Whether it's for automotive repairs, electrical wiring, or marine applications, this tape's color ensures that it blends seamlessly with most materials and surfaces.

One of the most significant attributes of this Self Bonding Silicone Tape is its impressive temperature resistance. Capable of withstanding temperatures up to 500°F, this tape maintains its integrity and bonding strength in extreme heat conditions. This feature is particularly important for applications that are exposed to high-temperature environments, such as engine parts, exhaust pipes, or heating elements. The tape's resilience in the face of intense heat ensures that it continues to perform reliably, providing a steadfast seal that won't degrade or lose its adhesive properties.

When it comes to adhesion strength, this Self Amalgamating Silicone Tape is unmatched. It boasts a high level of adhesion strength due to its self-fusing properties. Once applied, it begins to bond within minutes and achieves a complete seal within hours, ensuring a tight and secure wrap that won't unravel or loosen over time. The tape's ability to conform to irregular shapes and surfaces further enhances its adhesion capability, making it an indispensable tool for repairs that involve complex or uneven areas.

Another commendable feature of the Self Fusing Silicone Tape is its UV resistance. Exposure to ultraviolet light can cause many materials to deteriorate over time, but this tape is designed to withstand the harmful effects of the sun's rays. This UV resistance ensures that the tape will not crack, peel, or lose its flexibility when used in outdoor applications, making it an excellent choice for repairs that will be exposed to direct sunlight or harsh weather conditions.

The versatility of this tape is further underscored by its stretchable nature. The Stretchable Silicone Repair Tape can be extended to conform to any shape, providing a tight, leak-proof seal that is impermeable to fluids and gases. Whether you are wrapping a leaky hose, insulating electrical wires, or patching a small hole, this tape stretches to meet the demands of the task, ensuring a durable and flexible bond that moves with the material it is applied to.

In conclusion, the Self Fusing Silicone Tape is a must-have for anyone in need of a reliable, high-performance sealing solution. Its black color, exceptional temperature resistance, high adhesion strength, UV resistance, and stretchable properties make it the ideal choice for a wide range of applications. Whether you are a professional tradesperson or a DIY enthusiast, this Self Bonding Silicone Tape will prove to be an invaluable addition to your toolbox, providing a dependable and effective solution for all your repair and sealing needs.

### Features:

Product Name: Self Fusing Silicone Tape

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Width: 1 Inch

Maximum Voltage: 35kv

Material: Self Fusing Silicone

Adhesion Strength: High

Self Adhesive Silicone Tape

No-Residue Self Fusing Tape

### Technical Parameters:

Attribute	Specification
UV Resistant	Yes
Temperature Resistance	Up To 500°F
Material	Self Fusing Silicone
Maximum Voltage	35kv
Length	10 Feet
Waterproof	Yes
Flexibility	High
Application	Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.
Color	Yellow
Classification	Inorganic Insulation Material

### Applications:

The **zhonglei Self Fusing Silicone Tape**, originating from China, is a versatile and innovative product designed to provide a high level

of adhesion strength, along with exceptional heat resistance. This one-inch wide tape is a quintessential tool for a variety of applications due to its robust material composition and ability to withstand temperatures up to 500°F. The self-adhesive qualities of the tape make it an indispensable asset in both professional and personal settings.

One of the primary applications of this **Heat Resistant Silicone Tape** is in the automotive industry, where it can endure high-temperature environments under the hood. Mechanics and car enthusiasts alike employ the tape for sealing radiator hoses or insulating wiring to prevent heat-induced damage. The high temperature resistance also makes it ideal for wrapping exhaust pipes to contain heat and protect surrounding components.

In the realm of electronics, the zhonglei tape's heat-resistant feature comes in handy when bundling wires and cables near power sources or other high-heat components. The **Self Adhesive Silicone Tape** ensures the protection and insulation of delicate connections against thermal degradation, thus extending the life of electronic devices and systems.

Moreover, the product serves as an excellent **Waterproof Silicone Wrapping Tape** for plumbing repairs. Whether it's sealing a leaky pipe or reinforcing a joint, this tape creates a watertight seal that can resist the pressures of water systems. The self-fusing property ensures that the seal remains intact even in moist conditions, preventing further leakage or damage.

Outdoor enthusiasts and homeowners also find this tape beneficial for its weatherproofing capabilities. When applied to outdoor fixtures or tools, the tape forms a protective barrier against the elements, reducing corrosion and wear. It's particularly useful in marine applications, where saltwater and humidity can quickly erode less durable materials.

Lastly, due to its high adhesion strength and easy application, the zhonglei Self Fusing Silicone Tape is an excellent choice for emergency repairs. Whether it's a temporary fix on a damaged water hose or providing insulation on a frayed electrical wire, the tape's reliability and ease of use make it a must-have in any emergency repair kit.

In conclusion, the zhonglei Self Fusing Silicone Tape is a multi-functional product suitable for a plethora of scenarios, ranging from automotive maintenance to home repairs, electronics protection to outdoor preservation. Its unique combination of high adhesion strength, temperature resistance, and waterproof capabilities make it a superior choice for both professionals and DIY enthusiasts.

## Customization:

Welcome to our product customization services for zhonglei's Self Fusing Silicone Tape. Our tapes are made with high-quality standards in China, ensuring a reliable waterproof seal for a variety of applications including Electrical Insulation, Pipe Repair, and Emergency Hose Repair.

Our Self Amalgamating Silicone Tape boasts a width of 1 inch, perfect for covering a range of surfaces with ease. With a high dielectric strength of 400 V/mil, it provides excellent electrical insulation for your safety and convenience.

Known for its incredible adhesion strength, our Waterproof Silicone Wrapping Tape creates a secure, lasting bond that you can trust. Whether you're tackling household fixes or industrial-level repairs, our Insulating Self Fusing Tape is the go-to solution for a durable and effective wrap.

## Support and Services:

Thank you for choosing our Self Fusing Silicone Tape. We are committed to providing you with high-quality support and services to ensure your complete satisfaction with our product. Our Self Fusing Silicone Tape is designed for a wide range of applications and provides a durable, waterproof seal for a variety of repairs.

**Product Technical Support:**

Our knowledgeable technical support team is available to assist you with any product-related questions or concerns. We can guide you through the application process, provide tips for best results, and help troubleshoot any issues you may encounter. Whether you're dealing with plumbing repairs, electrical insulation, or automotive applications, our team has the expertise to offer reliable advice.

**Installation Guidance:**

For successful use of our Self Fusing Silicone Tape, follow the provided instructions carefully. Ensure surfaces are clean, dry, and free of any debris before applying the tape. Stretch the tape while wrapping it around the object for a tight seal, and always overlap layers for maximum adhesion and effectiveness.

**Product Services:**

Should you require further assistance beyond technical support, our product services include a comprehensive guide on best practices for storage and handling of the tape to maximize its lifespan. We also provide information on the various applications suitable for the tape and safety precautions to consider during use.

**Warranty and Replacement:**

We stand behind the quality of our Self Fusing Silicone Tape. It comes with a limited warranty covering manufacturing defects. If you encounter a product defect, please reach out to our support team for assistance with a warranty claim and information on our replacement policy.

We value your business and are here to ensure that your experience with our Self Fusing Silicone Tape is nothing short of excellent. Thank you for trusting us with your repair needs.

## Packing and Shipping:

**Product Packaging for Self Fusing Silicone Tape:**

Each roll of Self Fusing Silicone Tape is individually wrapped in clear plastic film to maintain its cleanliness and adhesive properties. The product label is affixed to the front of the roll, displaying the brand name, product name, dimensions, and usage instructions. Multiple rolls are then placed into a sturdy cardboard box, which is sealed and reinforced to prevent damage during transit. The box is labeled with the necessary shipping information, including a barcode and item SKU for inventory tracking purposes.

**Shipping Instructions for Self Fusing Silicone Tape:**

The cardboard boxes containing the Self Fusing Silicone Tape are packed into larger shipping cartons with protective padding materials to ensure stability and minimize movement during transportation. The shipping cartons are sealed with heavy-duty packing tape and clearly marked with the "Fragile" label to alert carriers of the contents' need for careful handling. All packages are shipped using a reliable courier service, with tracking information provided to the customer upon dispatch. The shipping label on the exterior of the carton includes the recipient's address, a return address, and any pertinent customs documentation for international orders.

## FAQ:

**Q1: What is zhonglei Self Fusing Silicone Tape used for?**

**A1:** Zhonglei Self Fusing Silicone Tape is designed for emergency repairs and electrical insulation. It can be used to seal leaks in plumbing, repair damaged wiring, and insulate electrical connections. The tape fuses to itself to create a water and air-tight seal without the need for adhesives.

**Q2: How do you apply zhonglei Self Fusing Silicone Tape?**

**A2:** To apply, clean and dry the surface, then stretch and wrap the tape around the object, overlapping each layer by about half the tape's width. The tape will begin to fuse within minutes, and the bond will strengthen over time. For best results, apply with tension to ensure a tight seal.

**Q3: Can zhonglei Self Fusing Silicone Tape be used on wet or oily surfaces?**

**A3:** While the tape adheres best to clean, dry surfaces, it can be applied to wet surfaces, provided that water isn't actively flowing over the area. It's not recommended for use on oily surfaces as oil can prevent the tape from fusing properly.

**Q4: Is zhonglei Self Fusing Silicone Tape resistant to extreme temperatures?**

**A4:** Yes, zhonglei Self Fusing Silicone Tape is designed to withstand extreme temperatures, both hot and cold, making it suitable for a wide range of applications, from automotive repairs to marine environments.

**Q5: What is the shelf life of zhonglei Self Fusing Silicone Tape, and how should it be stored?**

**A5:** Zhonglei Self Fusing Silicone Tape typically has a long shelf life when stored in a cool, dry place away from direct sunlight. Keep the tape in its original packaging to protect it from dust and contaminants that could affect its performance.
