

Anti Slip Self Fusing Silicone Tape Waterproof 35kv Max Voltage For Fishing Rod Handle

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 1000 rolls
- Supply Ability: 50000 Rolls per month

Product Specification

- Adhesion Strength: High
- Dielectric Strength: 400 V/mil
- Flexibility: High
- Material: Self Fusing Silicone
- Width: 1 Inch
- Color: Grey
- Maximum Voltage: 35kv
- Temperature Resistance: Up To 500°F
- Highlight: **self fusing waterproof tape 35kv,
Anti Slip self fusing waterproof tape**

Product Description

Product Description:

The Self Fusing Silicone Tape is a revolutionary solution in the realm of adhesive and sealing technologies. This high-quality product is designed to offer a durable and reliable fix to a multitude of problems that require sealing, insulating, or repairing. With a maximum voltage rating of 35kv, this tape is an exceptional choice for electrical insulation applications where high voltages are present. Whether you are a professional electrician, an enthusiastic DIYer, or someone in need of a dependable repair tape, this product is tailored to meet a wide range of needs.

Spanning a generous length of 10 feet, this tape provides ample material to cover larger areas or to be used across multiple projects. This length ensures that you have enough tape at your disposal to create an effective seal or insulation layer without worrying about running out too quickly. Moreover, categorized as an Inorganic Insulation Material, it boasts a composition that is not only resistant to heat and cold but also impervious to chemical corrosion, making it ideal for harsh environments and extreme conditions.

The Self Fusing Silicone Tape sets itself apart from conventional tapes with its superior flexibility. This high flexibility ensures that the tape can be wrapped around complex shapes and contours, providing a seamless and tight seal. Whether it's a small wire joint or a large pipe, the tape can be stretched and manipulated to fit snugly, ensuring a secure application every time. This flexibility also means that the tape is easy to handle and apply, even in tight or difficult-to-reach spaces.

At its core, the Self Fusing Silicone Tape is made from a Self Fusing Silicone material, which gives it its unique self-bonding properties. Known as the Self Bonding Silicone Tape, this material is capable of bonding to itself upon application, creating a secure, air- and watertight seal that is unrivaled by other tapes on the market. This self-bonding attribute negates the need for any sticky adhesives that can leave a messy residue, making it a Non-Tacky Silicone Tape that is clean and efficient to use.

The No-Residue Self Fusing Tape is a testament to the cleanliness and user-friendliness of this product. Unlike traditional adhesive tapes that can leave behind a sticky, difficult-to-clean residue, this silicone tape maintains a clean surface upon removal. This feature is especially beneficial in applications where cleanliness is paramount, such as in food processing plants, cleanrooms, or when maintaining the aesthetic integrity of a surface is crucial.

One of the most remarkable features of this tape is its ability to withstand a wide range of temperatures, from extreme heat to freezing cold. This makes it an excellent choice for outdoor applications, as well as for use in environments with fluctuating temperatures. Whether it's used to repair a leaky hose under the hood of a car or to insulate pipes exposed to the winter chill, the Self Fusing Silicone Tape remains reliable and effective.

In conclusion, the Self Fusing Silicone Tape is a versatile, high-performance product that excels in providing a durable seal, insulation, and repair solution. Its high voltage resistance, considerable length, inorganic material classification, outstanding flexibility, and self-fusing properties make it a must-have in any toolkit. Whether you're dealing with electrical insulation, plumbing repairs, or general maintenance tasks, this Non-Tacky Silicone Tape offers a no-mess, no-fuss solution that stands the test of time.

Features:

Product Name: Self Fusing Silicone Tape

UV Resistant: Yes

Maximum Voltage: 35kv

Feature: Heat-Resistant

Color: Grey

Temperature Resistance: Up to 500°F

Self Bonding Silicone Tape

Insulating Self Fusing Tape

Self Sealing Silicone Tape

Technical Parameters:

Attribute	Detail
Flexibility	High
Hs Code	40082100
UV Resistant	Yes
Classification	Inorganic Insulation Material
Color	Grey
Feature	Heat-Resistant
Temperature Resistance	Up To 500°F
Length	10 Feet
Dielectric Strength	400 V/mil
Adhesion Strength	High

Applications:

The **Zhonglei Self Fusing Silicone Tape**, originating from China, is an innovative repair solution designed to provide a durable and

reliable bond in a variety of scenarios. At a length of 10 feet, this tape boasts an impressive dielectric strength of 400 V/mil and can resist temperatures up to 500°F. Its UV resistant properties and ability to handle a maximum voltage of 35kv make it an indispensable tool for both professional and domestic applications.

One of the most common applications for this **Self Sealing Silicone Tape** is in electrical repairs. Its high dielectric strength makes it safe for insulating electrical wires and splices. Professionals in the electrical industry will find this tape ideal for creating moisture-proof seals in electrical connections and for jacketing high-voltage cables. The safety offered by its high-temperature resistance ensures that it can be used in environments with a risk of heat exposure, making it a **Heat Resistant Silicone Tape** that's essential in the toolbox of any electrician.

Additionally, the **Zhonglei Self Fusing Silicone Tape** is perfect for plumbing repairs. Whether it's a temporary fix or a long-term solution, this tape can be wrapped around leaking pipes or hoses to create a watertight and airtight seal. Its self-fusing properties mean that it bonds to itself without the need for adhesives, ensuring a lasting hold even on irregular surfaces or in tight spaces.

In the automotive sector, this tape is a must-have for emergency hose repairs. Under the hood, the **Self Sealing Silicone Tape** can withstand the high temperatures generated by the engine and exhaust systems. Car enthusiasts and mechanics can use it to seal coolant hoses, wiring harnesses, and protect components from heat, adding to its versatility as a **Heat Resistant Silicone Tape**.

Outdoor enthusiasts and adventurers will also appreciate the UV resistance of the **Zhonglei Self Fusing Silicone Tape**. It's perfect for making quick fixes on outdoor gear, from patching up a broken tent pole to reinforcing a damaged backpack strap, ensuring that exposure to the sun won't degrade its performance.

In conclusion, the Zhonglei Self Fusing Silicone Tape is a multifunctional product that serves a plethora of applications across various industries. Its strong adhesive properties, resistance to extreme temperatures, UV protection, and high voltage tolerance make it an ideal choice for anyone seeking a reliable, **Self Sealing Silicone Tape** for any repair or maintenance task.

Customization:

Brand Name: zhonglei
Place of Origin: China
Flexibility: High
Temperature Resistance: Up To 500°F
Dielectric Strength: 400 V/mil
Width: 1 Inch
UV Resistant: Yes

Discover the versatility of zhonglei's Non-Tacky Silicone Tape, your go-to solution for a variety of repairs. Made with high flexibility and UV resistance, this No-Residue Self Fusing Tape from China is designed to withstand temperatures up to 500°F. With a dielectric strength of 400 V/mil, it ensures safe electrical insulation. The 1-inch width Stretchable Silicone Repair Tape conforms easily to irregular shapes, creating a reliable, air- and water-tight seal without leaving any sticky residue behind.

Support and Services:

Thank you for choosing our Self Fusing Silicone Tape. We are committed to providing you with high-quality products and services. Our technical support and services for this product include:

Product Usage Guidance: Detailed instructions on how to apply and use the tape effectively for various applications, ensuring optimal performance and durability.

Installation Assistance: Step-by-step guidance through the installation process, including surface preparation and tape wrapping techniques.

Troubleshooting Support: Assistance in resolving any issues you may encounter while using the tape, including adherence problems, environmental factors, or application techniques.

Product Specifications: Comprehensive information on the product's physical properties, temperature ranges, chemical resistance, and other relevant technical data.

Maintenance Tips: Advice on how to maintain the integrity of the tape over time, including storage recommendations and inspection tips.

Warranty Information: Details on the product warranty, including coverage, limitations, and how to make a claim if necessary.

Our aim is to ensure that you have a seamless experience with our product, and our technical support team is dedicated to helping you with any questions or concerns you may have.

Packing and Shipping:

Product Packaging:

Each roll of Self Fusing Silicone Tape is individually wrapped in clear plastic to protect it from dust and moisture. The wrapped rolls are then placed inside a durable cardboard box, which provides additional protection during handling. The box is sealed with tamper-evident tape and clearly labeled with product information, including size, color, usage instructions, and barcodes for inventory management.

Shipping:

The boxed Self Fusing Silicone Tape rolls are packed into larger shipping cartons with adequate cushioning material to prevent movement and potential damage during transit. The shipping cartons are securely sealed and labeled with the necessary shipping information, including destination address, package weight, and tracking number. Our products are shipped using reputable carriers to ensure timely and safe delivery to our customers.

FAQ:

Q1: What is zhonglei Self Fusing Silicone Tape used for?

A1: zhonglei Self Fusing Silicone Tape is used for a variety of applications, including emergency repairs, electrical insulation, waterproofing, and sealing connections. It's ideal for wrapping around pipes, hoses, wires, and other items that need to be protected or repaired.

Q2: How does zhonglei Self Fusing Silicone Tape work?

A2: The tape is self-fusing, meaning it bonds to itself when stretched and wrapped around an object. Once applied, it forms a solid rubbery, non-slip bond that is watertight and electrically insulating.

Q3: Can zhonglei Self Fusing Silicone Tape be used on wet surfaces or under water?

A3: Yes, zhonglei Self Fusing Silicone Tape can be applied to wet surfaces and can even be used under water. It's an excellent choice for making underwater repairs due to its waterproof properties.

Q4: Is the zhonglei Self Fusing Silicone Tape resistant to extreme temperatures?

A4: Absolutely. zhonglei Self Fusing Silicone Tape is designed to withstand extreme temperatures, making it suitable for use in a range of environments, from hot to cold.

Q5: Is zhonglei Self Fusing Silicone Tape easy to remove?

A5: While zhonglei Self Fusing Silicone Tape is designed to create a permanent seal, it can be removed when necessary. The tape does not leave a sticky residue, which makes removal cleaner compared to traditional adhesive tapes.
