

Waterproof Anti Slip Self Fusing Silicone Tape Uv Resistant For Fishing Rod Handle

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 1000 rolls
- Supply Ability: 50000 Rolls per month

Product Specification

- Hs Code: 40082100
- Feature: Heat-Resistant
- Waterproof: Yes
- Color: White
- Uv Resistant: Yes
- Temperature Resistance: Up To 500°F
- Material: Self Fusing Silicone
- Self-adhesive Strength: 6.3 N/cm
- Highlight: Fishing Rod self fusing silicone tape,
Fishing Rod self fusing waterproof tape,
self fusing silicone tape Uv Resistant

Product Description

Product Description:

Introducing our top-of-the-line No-Residue Self Fusing Tape, a versatile and essential tool for repairs, electrical work, and plumbing. Made from high-quality Self Fusing Silicone, this tape is uniquely designed to provide a durable and reliable seal on a variety of surfaces.

Thanks to its innovative self-bonding properties, our Self Bonding Silicone Tape delivers an airtight and watertight seal that is unrivaled in the industry. Its HS Code, 40082100, classifies it as an inorganic insulation material, which attests to its high standard of manufacturing and suitability for a wide range of applications.

The tape measures a convenient width of 1 Inch, making it an ideal choice for both large-scale projects and quick home repairs. The size is perfect for wrapping around pipes, hoses, electrical wiring, and even for automotive applications. The tape's flexibility is classified as high, allowing it to conform seamlessly to irregular shapes and surfaces. This characteristic ensures that the tape can be applied smoothly and without creases, providing a professional finish every time.

Our No-Residue Self Fusing Tape boasts a multitude of features that set it apart from traditional adhesive tapes. One of the most significant advantages is its no-residue design. Unlike other tapes that can leave behind a sticky, messy residue upon removal, our Self Bonding Silicone Tape can be removed cleanly and easily, maintaining the integrity and appearance of the surface it was applied to. This feature is particularly beneficial for temporary repairs or applications where cleanliness is paramount.

The self-fusing nature of the tape means that it does not rely on adhesives to bond to surfaces or even to itself. Instead, it forms a permanent bond through a chemical process, activated by pressure and the tape's inherent properties. This creates a bond that is incredibly strong and resistant to heat, cold, moisture, and various chemicals, making it an ideal solution for both indoor and outdoor use. Its inorganic composition ensures that it will not degrade over time, maintaining its performance characteristics even under extreme conditions.

Safety is a key concern in any application, and our Self Fusing Silicone Tape excels in this regard. It is an excellent insulator and can be used to safely seal and protect electrical connections up to 8000 volts, providing peace of mind for any electrical project. Additionally, the high flexibility of the tape allows it to stretch up to 300% of its original length, which further enhances its ability to create a secure seal and accommodate movement or expansion of the bonded materials.

The ease of use of our No-Residue Self Fusing Tape cannot be overstated. It requires no heat or tools for application; simply stretch and wrap the tape around the desired object, and it will fuse to itself within minutes. The tape is also easy to cut, allowing for precise application without the need for specialized equipment. Whether you're a professional tradesperson or a DIY enthusiast, our tape is an indispensable addition to your toolkit.

In summary, our Self Bonding Silicone Tape is a highly effective, durable, and versatile no-residue solution for a wide range of sealing and insulating applications. Its unique material properties, combined with its ease of use, make it an industry-leading product for professionals and homeowners alike. Whether you need to repair a leaky hose, insulate electrical wiring, or perform any number of other tasks, our No-Residue Self Fusing Tape is the reliable choice that will exceed your expectations.

Features:

Product Name: Self Fusing Silicone Tape

Application: Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.

Temperature Resistance: Up To 500°F

Material: Self Fusing Silicone

Color: White

Flexibility: High

Keywords: Self Adhesive Silicone Tape, Self Bonding Silicone Tape, Insulating Self Fusing Tape

Technical Parameters:

Parameter	Specification
Length	1 Feet
Hs Code	40082100
Adhesion Strength	High
UV Resistant	Yes
Dielectric Strength	400 V/mil
Waterproof	Yes
Material	Self Fusing Silicone
Flexibility	High
Application	Electrical Insulation, Pipe Repair, Emergency Hose Repair, Etc.
Temperature Resistance	Up To 500°F

Applications:

The zhonglei brand, originating from China, introduces its top-of-the-line Self Fusing Silicone Tape, an innovation in the realm of inorganic insulation materials. This tape, boasting a high adhesion strength, is crafted from a self-fusing silicone material that melds to itself to

create a secure bond. The sleek black color of the tape ensures a professional finish for a wide array of applications. This product, carrying the Hs Code 40082100, is a testament to its quality and reliability.

Designed as a Waterproof Silicone Wrapping Tape, this product is ideal for applications that require a watertight seal. It is perfect for emergency repairs on hoses, pipes, and fittings in wet environments, including marine, gardening, and plumbing scenarios. The zhonglei Self Fusing Silicone Tape can also be used to insulate electrical wires and connections, offering protection against moisture and corrosion.

This Self Bonding Silicone Tape is a versatile tool for the automotive industry. It can withstand high temperatures, making it suitable for under-the-hood repairs. Whether it's used for wrapping electrical systems, hydraulic hoses, or exhaust pipes, the tape ensures a durable bond that resists automotive fluids and road salts. The self-adhesive property of the tape eliminates the need for sticky residues, leaving a clean and maintained look for all types of vehicles.

Moreover, the Self Adhesive Silicone Tape is an asset in the electronics sector, where a strong and resilient insulating material is crucial. The tape's ability to conform to irregular shapes and surfaces makes it excellent for protecting and sealing sensitive components. It can be applied in various settings, from home electronics to industrial machinery, safeguarding against dust, dirt, and vibration.

Outdoor enthusiasts and adventure sports aficionados will find the zhonglei Self Fusing Silicone Tape a must-have in their repair kits. It is used for making quick fixes on camping gear, sports equipment, and even for reinforcing the grips on tools and sporting goods. Its resistance to weathering and UV light ensures a lasting application, no matter the occasion or scenario.

In summary, the zhonglei Self Fusing Silicone Tape is a multi-purpose, high-strength, and reliable solution for a myriad of sealing and insulating needs. Its robust inorganic insulation material composition, combined with its self-fusing and waterproof capabilities, makes it an indispensable product for both professional and personal use.

Customization:

Enhance your repair toolkit with zhonglei's premium Self Fusing Silicone Tape, meticulously crafted for reliability and performance. Originating from China, this versatile tape boasts an impressive maximum voltage tolerance of 35kv, ensuring electrical projects are safely managed. The superior self-adhesive properties make it an excellent choice for a wide range of applications.

Made from high-quality Self Fusing Silicone, the tape is designed to withstand the toughest of environments, validated by its Hs Code of 40082100. Its inherent waterproof characteristic makes it ideal for sealing and repairing in moist conditions. The tape's exceptional Dielectric Strength of 400 V/mil provides added safety and durability, catering to the most demanding electrical insulation needs.

Whether you're looking for a reliable Self Amalgamating Silicone Tape or a Stretchable Silicone Repair Tape, zhonglei's product ensures seamless integration and protection for your projects. Its flexibility and easy application make it a must-have for professionals and DIY enthusiasts alike. Trust zhonglei to deliver the quality and resilience your tasks demand.

Support and Services:

Welcome to the Product Technical Support and Services section for our Self Fusing Silicone Tape. Our team is dedicated to providing you with comprehensive support to ensure you get the best performance and longevity from our product. This tape is designed for a variety of applications, including emergency repairs, electrical wiring, plumbing, and more. Here are some of the services and support options we offer:

Product Inquiry: If you have any questions about the product, its application, or specifications, feel free to reach out to us. We can provide detailed information about the tape's capabilities and the best practices for its use.

Application Guidance: Need help with how to apply the Self Fusing Silicone Tape? Our experts can guide you through the process, offer tips for a seamless application, and advise on how to ensure a long-lasting hold.

Troubleshooting: Experiencing issues with the tape? Let us know the problem, and our technical support team will help diagnose the issue and suggest solutions to resolve it effectively.

Product Feedback: We are always looking to improve our products. If you have any feedback or suggestions, please share them with us. Your input is valuable in helping us to enhance product performance and customer satisfaction.

Safety Information: Safety is a top priority. We provide comprehensive safety information regarding the use of our Self Fusing Silicone Tape, including handling, storage, and disposal guidelines.

Warranty Support: Our Self Fusing Silicone Tape comes with a warranty. If you encounter any defects in materials or workmanship, please refer to our warranty policy and reach out for assistance with a claim.

Our team is committed to providing exceptional support and service. We are here to ensure that your experience with our Self Fusing Silicone Tape is nothing short of excellent. For any further assistance, please contact us through the appropriate customer service channels.

Packing and Shipping:

Product Packaging for Self Fusing Silicone Tape:

The Self Fusing Silicone Tape is securely wrapped in a protective film to ensure it remains clean and non-sticky during transit. The tape is then rolled onto a plastic spool to prevent any deformation. Each spool is placed inside a sturdy cardboard box, which is printed with product information, usage instructions, and safety warnings. The box is sealed with tamper-evident tape to guarantee product integrity upon arrival.

Shipping Instructions for Self Fusing Silicone Tape:

The packaged Self Fusing Silicone Tape boxes are then grouped into quantities appropriate for standard shipping containers or custom orders. These boxes are placed into larger, durable shipping cartons with adequate cushioning materials to prevent movement and potential damage during transit. The shipping cartons are sealed with heavy-duty shipping tape and labeled with the necessary shipping information, including a barcode and handling symbols. All packages are dispatched through a reliable courier service with tracking capabilities to ensure timely and secure delivery to our customers.

FAQ:

Q1: What is zhonglei Self Fusing Silicone Tape used for?

A1: Zhonglei Self Fusing Silicone Tape is a versatile product used for emergency repairs, electrical insulation, plumbing fixes, and more. It creates a waterproof, airtight seal and is suitable for use on various materials including metal, plastic, and rubber.

Q2: How does zhonglei Self Fusing Silicone Tape differ from regular adhesive tapes?

A2: Unlike regular adhesive tapes that have a sticky surface, zhonglei Self Fusing Silicone Tape only adheres to itself when wrapped under tension, forming a solid rubber layer over the area being repaired. It does not leave any sticky residue and can withstand extreme temperatures and pressures.

Q3: Can I use zhonglei Self Fusing Silicone Tape on wet surfaces or underwater?

A3: Yes, zhonglei Self Fusing Silicone Tape can be applied on wet surfaces and even underwater. It's ideal for making quick repairs on

leaking pipes or hoses without the need to drain the system first.

Q4: Is zhonglei Self Fusing Silicone Tape resistant to heat and cold?

A4: Absolutely. Zhonglei Self Fusing Silicone Tape is designed to withstand extreme temperature ranges, maintaining its performance in environments from -50°C to 260°C, making it suitable for a wide range of applications.

Q5: How long does it take for zhonglei Self Fusing Silicone Tape to fuse completely?

A5: Zhonglei Self Fusing Silicone Tape begins to bond immediately upon application and typically takes about 24 hours to fully cure and achieve maximum bonding strength. However, it creates an effective seal within minutes, which can be sufficient for temporary or emergency repairs.
