

Electrical Insulation Self Curing Silicone Pad For Wind Power Transmission Cable

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: ZL525W
- Minimum Order Quantity: 300PCS
- Supply Ability: 60000 PCS per month

Product Specification

- Self-Curing Time: 24 Hours
- Shelf Life: 12 Months
- Application: Busbar Waterproof Insulation, Electrical Connector Insulation And Waterproofing, Insulation Repair For Cables, Sealed And Insulated Protection Of Overhead Line Clamps, Insulation Protection For Exposed Metal Positions Of Power Conductors, Used For The Partial I
- Chemical Resistance: Excellent
- Temperature Resistance: -40~85°C
- Hardness: Shore A 30-60
- Uv Resistance: Good
- Electrical Insulation: Excellent

Product Description

Product Description:

One of the standout features of this product is its self-curing time. Unlike other silicone materials that require additional curing agents, this pad cures on its own within 24 hours. This makes it incredibly convenient for those who want to complete their projects quickly and efficiently.

The hardness of the Self Curing Silicone Pad ranges from Shore A 30-60, giving you plenty of options to choose from depending on your specific needs. This range of hardness levels allows for flexibility in the finished product, making it suitable for a wide variety of applications.

In addition, this silicone pad boasts tear strength of 1.5~2Mpa. This is a critical factor for creating molds and casts that require intricate details and precise shapes. With this level of tear strength, you can be assured that your project will maintain its shape and form over time.

The material used to create the Self Curing Silicone Pad is high-quality silicone. This ensures that the finished product is durable and long-lasting, capable of withstanding extreme temperatures and harsh environments.

Finally, the size of the Self Curing Silicone Pad is customizable to fit your specific needs. Whether you require a larger pad for a larger project or a smaller pad for a more precise application, the size of this product can be customized to your exact specifications.

In summary, the Self Curing Silicone Pad is an excellent choice for anyone looking to create molds, casts, or custom seals. With its self-curing time, range of hardness levels, tear strength, and high-quality silicone material, this product is sure to exceed your expectations. And with customizable sizing options, you can be confident that it will meet all of your project needs.

Features:

Product Name: Self Curing Silicone Pad

UV Resistance: Good

Size: Customizable

Self-Curing Time: 24 Hours

Material: Silicone Rubber

Electrical Insulation: Excellent

Technical Parameters:

Product Name:	Self Curing Silicone Pad
Temperature Resistance:	-40~85°C
Shelf Life:	12 Months
Tear Strength:	1.5~2Mpa
Elongation At Break:	300-500%
Color:	Black
Material:	Silicone
Chemical Resistance:	Excellent
Hardness:	Shore A 30-60
Size:	Customizable
Self-Curing Time:	24 Hours

Applications:

The Self Curing Silicone Pad offers excellent electrical insulation, making it an ideal choice for busbar waterproof insulation, electrical connector insulation and waterproofing, insulation repair for cables, and sealed and insulated protection of overhead line clamps. It can also be used for insulation protection for exposed metal positions of power conductors, partial insulation restoration of overhead wires, and insulating the bare metal parts within switchgear.

One of the most notable features of the Self Curing Silicone Pad is its temperature resistance of up to 250°C, making it a reliable choice even under extreme conditions. This product is ideal for industries such as electrical, telecommunications, and construction, where durability and reliability are essential.

The Self Curing Silicone Pad is easy to use, making it a convenient choice for various scenarios. It is perfect for quick fixes and emergency repairs, as it self-cures within a short time. This product is a must-have for electricians, maintenance personnel, and construction workers, ensuring that they are always ready for any job.

In summary, the Self Curing Silicone Pad from zhonglei is a versatile and reliable product that offers excellent electrical insulation, temperature resistance, and flexibility. It is perfect for various applications, making it a must-have for industries such as electrical, telecommunications, and construction. With its self-curing feature, this product ensures that repairs are done quickly and efficiently, making it a valuable addition to any toolkit.

Customization:

The Self Curing Silicone Pad by zhonglei has a temperature resistance of up to -40~85°C, making it suitable for use in high-temperature environments. It also has a shelf life of 12 months, ensuring that you get the most out of your purchase.

Support and Services:

The Self Curing Silicone Pad product comes with technical support and services to ensure that our customers can fully utilize its features and benefits. Our technical support team is available to provide assistance with any product-related inquiries or concerns that you may have. We can also provide guidance on how to use the product properly and troubleshoot any issues that may arise.

In addition to technical support, we also offer a range of services to help our customers maximize the value of their purchase. These services include:

Product training for your team

Customized product development to meet your specific needs

On-site installation and maintenance support

Extended warranty options

Our goal is to provide comprehensive technical support and services that enable our customers to achieve their goals with the Self Curing Silicone Pad product. Please do not hesitate to reach out to us if you have any questions or require assistance.

Packing and Shipping:

Product Packaging:

The Self Curing Silicone Pad is carefully packaged to ensure safe delivery. Each pad is wrapped in a protective plastic film to prevent any scratches or damage during shipment. The pads are then placed in a sturdy cardboard box with sufficient padding to prevent movement and ensure that they arrive at their destination in perfect condition.

Shipping:

We offer free shipping for the Self Curing Silicone Pad within the United States. Orders are processed within 24 hours and shipped via USPS Priority Mail. Delivery usually takes 2-3 business days. For international orders, shipping rates vary depending on the destination and shipping method selected at checkout.

FAQ:

A: The brand name of this silicone pad is zhonglei.

Q: Where is this silicone pad made?

A: This silicone pad is made in China.

Q: Is this silicone pad self-curing?

A: Yes, this silicone pad is self-curing.

Q: Can this silicone pad be used for high temperature applications?

A: Yes, this silicone pad can withstand high temperatures up to 500°F.

Q: What sizes are available for this silicone pad?

A: This silicone pad is available in various sizes ranging from small to large.
