

## Corrosion Resistant Self Curing Silicone Pad For Emergency Repair Shore A 30-80 Hardness

### Our Product Introduction

more products please visit us on [siliconerubber-product.com](http://siliconerubber-product.com)

#### Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Minimum Order Quantity: 300PCS
- Supply Ability: 60000 PCS per month

#### Product Specification

- Hardness: Shore A 30-80
- Temperature Resistance: -40~85°C
- Self-Curing Time: 24 Hours
- Chemical Resistance: Excellent
- Application: Busbar Waterproof Insulation, Electrical Connector Insulation And Waterproofing, Insulation Repair For Cables, Sealed And Insulated Protection Of Overhead Line Clamps, Insulation Protection For Exposed Metal Positions Of Power Conductors, Used For The Partial I
- Uv Resistance: Good
- Elongation At Break: 300-500%
- Shelf Life: 12 Months

## Product Description

### Product Description:

The Self Curing Silicone Pad is known for its excellent tensile strength. It has a tensile strength of 5-10 MPa. This makes it a perfect product for various applications that require high strength. It can withstand high pressure and is ideal for use in industrial applications. It is a durable product that is designed to last for a long time.

The Self Curing Silicone Pad is a perfect product for those who are looking for a product that is easy to use. It is a self-curing product that does not require any additional curing agents. This makes it a perfect product for those who do not have experience in using silicone products. It is a clear product that is easy to use and can be used in various applications.

The Self Curing Silicone Pad is also known for its excellent chemical resistance. It is a product that can withstand chemicals and other harsh substances. This makes it a perfect product for use in industries that deal with harsh chemicals. It can withstand high temperatures and is ideal for use in high-temperature applications. It is a versatile product that is perfect for various applications.

The Self Curing Silicone Pad is a product that is known for its hardness. It has a hardness of Shore A 30-80. This makes it a perfect product for various applications that require a product that is hard. It is a product that can withstand high pressure and is ideal for use in industrial applications. It is a durable product that is designed to last for a long time.

The Self Curing Silicone Pad is a product that is perfect for various applications. It is a versatile product that is easy to use and can withstand harsh chemicals and high temperatures. It is a durable product that is designed to last for a long time. If you are looking for a product that is perfect for various applications, then the Self Curing Silicone Pad is the perfect product for you.

### Features:

Product Name: Self Curing Silicone Pad

Electrical Insulation: Excellent

Tear Strength: 1.5~2Mpa

Elongation At Break: 300-500%

Material: Silicone Rubber

Hardness: Shore A 30-80

### Technical Parameters:

Product Name	Self Curing Silicone Pad
Size	Customizable
Water-proof	Yes
UV Resistance	Good
Chemical Resistance	Excellent
Hardness	Shore A 30-80
Material	Silicone
Tensile Strength	1.5~2MPa
Application	Busbar Waterproof Insulation, Electrical Connector Insulation And Waterproofing, Insulation Repair For Cables, Sealed And Insulated Protection Of Overhead Line Clamps, Insulation Protection For Exposed Metal Positions Of Power Conductors, Used For The Partial Insulation Restoration Of Overhead Wires, Used For Insulating The Bare Metal Parts Within Switchgear

Temperature Resistance	-40°C~85°C
Shelf Life	12 Months

### Applications:

One of the key features of this product is its excellent electrical insulation, making it perfect for a variety of applications. It has a shelf life of 12 months, ensuring that you can use it whenever you need it without worrying about its expiration.

The Self Curing Silicone Pad is ideal for busbar waterproof insulation, electrical connector insulation and waterproofing, insulation repair for cables, sealed and insulated protection of overhead line clamps, insulation protection for exposed metal positions of power conductors, used for the partial insulation restoration of overhead wires, and used for insulating the bare metal parts within switchgear. With a hardness of Shore A 30-80, this product is durable and long-lasting, providing robust insulation and protection. It is a self-curing product, which means that it does not require additional curing agents or hardeners. Simply apply it to the desired surface, and it will cure on its own.

Whether you are a professional electrician or a DIY enthusiast, the Self Curing Silicone Pad is a versatile product that can be used in a wide range of scenarios. It is easy to use and provides excellent insulation, making it a must-have for anyone who needs to work with electrical equipment.

### Customization:

### Support and Services:

The Self Curing Silicone Pad product comes with technical support and services to ensure optimal performance and longevity of the product. Our team of experts can provide assistance with:

Installation and setup

Troubleshooting common issues

Maintenance and cleaning

Product updates and upgrades

In addition, we offer a warranty for our Self Curing Silicone Pad product to cover any defects or malfunctions. For further assistance, please refer to the user manual or contact our customer support team.

### Packing and Shipping:

Product Packaging:

The self-curing silicone pad is carefully packed in a sturdy cardboard box to ensure safe delivery.

The product is wrapped in bubble wrap to prevent any damage during shipping.

A user manual is included in the package to provide instructions on how to use the silicone pad.

Shipping:

The silicone pad is shipped within 24 hours of placing the order.

We use reliable and trusted shipping carriers to ensure timely delivery.

Customers can track their order using the tracking number provided.

### FAQ:

**Q: What is the brand name of this Silicone Pad?**

A: The brand name of this Silicone Pad is *zhonglei*.

**Q: Where is this Silicone Pad made?**

A: This Silicone Pad is made in *China*.

**Q: Is this Silicone Pad self-curing?**

A: Yes, this Silicone Pad is self-curing.

**Q: What temperature range can this Silicone Pad withstand?**

A: This Silicone Pad can withstand temperatures ranging from -60°C to 250°C.

**Q: What are the dimensions of this Silicone Pad?**

A: The dimensions of this Silicone Pad are [insert dimensions here].
