

## White Colour Damping Self Fusing Silicone Tape Anti Slip For Golf Club Handles

Our Product Introduction

more products please visit us on [siliconerubber-product.com](http://siliconerubber-product.com)

### Basic Information

- Place of Origin: China
- Brand Name: zhonglei
- Model Number: zl6030si
- Minimum Order Quantity: 1000 rolls
- Supply Ability: 50000 Rolls per month

### Product Specification

- Application: For Repair Work
- Material: Silicone
- Tear Resistant: Yes
- Color: White
- Easy To Use: Yes
- Feature: Heat-Resistant
- Flexible: Yes
- Width: 1 Inch
- Damping: Yes
- Water-proof: Yes
- Highlight: **Damping Self Fusing Silicone Tape ,  
White Self Fusing Silicone Tape ,  
White Self Fusing Tape Anti Slip**

## Product Description

### Product Description:

One of the best things about this tape is how easy it is to use. Simply wrap it around the area you need to insulate, and the tape will start fusing to itself, creating a tight seal. This ease of use makes it perfect for any DIY enthusiast or professional electrician. The Insulating Self Fusing Tape is classified as an inorganic insulation material. This means that it is a non-metallic material that is resistant to heat and electricity. This classification makes it perfect for use in electrical applications where insulation is required. Another great feature of this tape is its flexibility. The silicone material used in this tape allows it to conform to any shape, making it perfect for use in tight spaces. This flexibility also ensures that the tape will not crack or break over time, ensuring a long-lasting seal. The tape comes in a sleek black color, making it perfect for use in applications where aesthetics are important. The black color also makes it easy to see where the tape has been applied, ensuring that you have applied the tape correctly. Overall, the Insulating Self Fusing Tape is a high-quality tape that is perfect for use in a variety of applications. Its rubber adhesive, ease of use, inorganic insulation material classification, flexibility, and black color make it a must-have for any toolkit. Whether you are an electrician, DIY enthusiast, or just need to insulate something, this tape is sure to get the job done right.

### Features:

Product Name: Self Fusing Silicone Tape  
HS Code: 40082100  
Width: 1 Inch  
Easy To Use: Yes  
Pressure Sensitive: Yes  
Color: White  
Waterproof Silicone Wrapping Tape  
Self Bonding Silicone Tape  
Insulating Self Fusing Tape

### Technical Parameters:

Classification:	Inorganic Insulation Material
Application:	For Repair Work
Tear Resistant:	Yes
Insulating:	Yes
Feature:	Heat-Resistant
Flexible:	Yes
Pressure Sensitive:	Yes
Hs Code:	40082100
Width:	1 Inch
Easy To Use:	Yes

### Applications:

One of the key features of this tape is that it is self-fusing, which means that it bonds to itself without leaving any residue behind. This makes it an excellent choice for applications where a clean and tidy finish is important, such as repairing hoses, cables, or pipes. Because it is self-sealing, it can also be used to create a watertight seal, making it perfect for outdoor projects or in wet environments.

The Self Amalgamating Silicone Tape is also incredibly easy to use. Simply wrap the tape around the object you want to secure, and it will bond to itself, creating a strong and durable seal. Because it is pressure-sensitive, the tape will conform to the shape of the object, ensuring a tight and secure grip.

There are many occasions and scenarios where the Self Amalgamating Silicone Tape can be used. Some of the most common applications include:

Electrical projects: The insulating properties of the tape make it an excellent choice for electrical projects, such as repairing or splicing wires.

Plumbing projects: The tape can be used to repair leaks in pipes or hoses, or to create a watertight seal around fittings.

Automotive projects: The tape can be used to repair hoses, cables, or other components in a vehicle.

Outdoor projects: Because the tape is self-sealing and waterproof, it can be used for a wide range of outdoor projects, such as repairing camping gear or creating a watertight seal on a boat.

In conclusion, the Self Amalgamating Silicone Tape by zhonglei is a versatile and durable tape that is perfect for a wide range of applications. With its no-residue self-fusing design, insulating properties, and ease of use, it is an excellent choice for anyone who needs a strong and reliable tape for their projects.

## Customization:

Our zhonglei Self Sealing Silicone Tape is made in China and complies with international standards. The product has a material composition of silicone and rubber adhesive, which makes it highly durable and long-lasting. It has an HS code of 40082100. With our product customization services, you can personalize your Self Fusing Silicone Tape to meet your specific requirements. Whether you need a specific color or size, we can help you create the perfect No-Residue Self Fusing Tape for your needs.

## Support and Services:

Our Self Fusing Silicone Tape is designed to provide a high-performance solution for sealing, bundling, and repairing applications. The tape is made from a silicone rubber material that fuses to itself when wrapped around an object, creating a permanent, air and water-tight seal.

The tape is highly resistant to temperature extremes, chemicals, and UV radiation, making it ideal for use in harsh environments. It can be used to repair and insulate electrical wires, hoses, pipes, and other equipment, as well as for emergency repairs on automotive, marine, and aerospace applications.

We offer a range of technical support and services for our Self Fusing Silicone Tape, including:

Technical data sheets and product specifications

Application guidelines and recommendations

Custom formulations and colors for specific applications

Expert advice and troubleshooting support

Our team of experienced engineers and technicians are dedicated to helping you get the most out of our Self Fusing Silicone Tape, and are available to answer any questions or concerns you may have.
