

5m Self Fusing Electrical Tape Black Waterproof Electrical Insulation Tape

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei

Product Specification

- Thickness: 0.8mm
- Length: 5m
- Uv Resistant: Yes
- Insulation: Yes
- Adhesive: No
- Temperature Resistance: Up To 260°C
- Color: Black
- Waterproof: Yes
- Highlight: **5m Self Fusing Electrical Tape,
Self Fusing Electrical Tape Waterproof,
Black Waterproof Electrical Insulation Tape**

Product Description

Product Description:

The Self-Bonding Silicone Tape is made of high-quality silicone material that provides excellent insulation and protection against moisture, heat, and corrosion. This type of tape is perfect for outdoor applications because it is UV resistant, which means it can withstand exposure to sunlight without deteriorating or losing its adhesive properties.

One of the main advantages of the Self-Bonding Silicone Tape is its self-amalgamating feature. This means that when the tape is wrapped around a wire or cable, it fuses with itself to form a tight, permanent seal that is resistant to water, oil, and chemicals. The self-bonding property of this tape makes it ideal for emergency repairs or quick fixes, as it can be applied without the need for any additional tools or adhesives.

The Self-Bonding Silicone Tape is also very easy to use. To apply the tape, simply stretch it out and wrap it around the object you want to insulate or protect. As you wrap the tape, it will bond to itself and create a tight seal. The tape can be easily cut with a pair of scissors or a knife, making it easy to customize the length to fit your needs.

Overall, the Self-Bonding Silicone Tape is a must-have for anyone who needs a reliable, durable, and easy-to-use electrical tape.

Whether you are a professional electrician or a DIY enthusiast, this tape will make your life easier and your projects more successful. So why wait? Order your Self-Bonding Silicone Tape today and see the difference it can make!

Features:

Product Name: Self Fusing Electrical Tape

Waterproof: Yes

Stretchable: Yes

Length: 5m

Adhesive: No

Thickness: 0.8mm

Keywords: Self-Sealing Insulating Tape, Self-Amalgamating High Voltage Tape, Self-Bonding Silicone Tape

Technical Parameters:

Width	50mm
Self-Fusing	Yes
Temperature Resistance	Up To 260°C
Voltage Resistance	Up To 30KV
Length	5m
Thickness	0.8mm
Application	Electrical Insulation And Sealing
Color	Black
UV Resistant	Yes
Tear Resistant	Yes

This Self-Bonding Silicone Tape, Self-Bonding Silicone Tape, Self-Amalgamating High Voltage Tape has a width of 50mm and is self-fusing, providing electrical insulation and sealing. It has a temperature resistance of up to 260°C and voltage resistance of up to 30KV. With a length of 5m and thickness of 0.8mm, it is tear-resistant and UV-resistant.

Applications:

The thickness of the tape is 0.8mm, making it ideal for use in applications where insulation is necessary. The tape is also wide, with a width of 50mm, making it easy to apply and providing ample coverage. It is a Self-Sealing Insulating Tape that provides excellent electrical insulation and protection against moisture and other environmental factors.

With its high temperature resistance and superior insulation properties, zhonglei Self-Fusing Electrical Tape is perfect for use in a variety of occasions and scenarios. Here are some of the most common applications:

Electrical wiring: The tape can be used to insulate and protect electrical wiring, preventing shorts, sparks, and other hazardous occurrences. It is particularly useful in high-temperature environments, where other types of tape may melt or break down.

Plumbing: The tape can be used to seal leaks and prevent water damage. Its self-sealing properties make it an excellent choice for wrapping pipes and fittings, and its insulation properties can help to prevent freezing and other plumbing-related problems.

Automotive: The tape can be used to repair and protect wiring and hoses in cars, trucks, and other vehicles. Its high-temperature resistance makes it an ideal choice for use in engines and other areas where heat is a concern.

Outdoor applications: The tape can be used to repair and protect outdoor equipment, such as garden hoses, sprinkler systems, and outdoor lighting. Its self-sealing properties make it an excellent choice for use in wet or damp environments.

In conclusion, zhonglei Self-Fusing Electrical Tape is a versatile and reliable product that can be used in a wide range of applications. Its high temperature resistance, thickness, width, and self-sealing properties make it an ideal choice for electrical, plumbing, automotive, and outdoor applications.

Customization:

Support and Services:

Our Self Fusing Electrical Tape is designed to provide superior protection and insulation for electrical components. It is made from high-quality silicone rubber that is self-bonding, self-fusing, and resistant to moisture, chemicals, and extreme temperatures.

Our team of technical support specialists is available to assist you with any questions or issues related to the use of our product. We provide expert advice on installation, maintenance, and troubleshooting to ensure that you get the most out of your Self Fusing Electrical Tape.

In addition to our technical support services, we also offer a range of value-added services to help you optimize the performance of your electrical systems. These include on-site training, customized product development, and ongoing maintenance and repair services. Contact us today to learn more about our Self Fusing Electrical Tape and the technical support and services we offer to our customers.

Packing and Shipping:

Product Packaging:

The Self Fusing Electrical Tape product is packaged in a sturdy plastic container that keeps the tape protected and prevents it from unraveling. The container measures 3 inches in diameter and 1.5 inches in height, making it easy to store and transport.

Shipping:

Our Self Fusing Electrical Tape product is shipped in a sturdy cardboard box to ensure it arrives safely to its destination. We use reliable carriers to ensure prompt delivery and provide tracking information so you can keep track of your order.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is zhonglei.

Q: Where is this product made?

A: This product is made in China.

Q: What is the Self Fusing Electrical Tape used for?

A: The Self Fusing Electrical Tape is used to insulate and seal electrical connections and wires.

Q: Is this product heat resistant?

A: Yes, this product is heat resistant and can withstand high temperatures.

Q: Can this tape be used in outdoor applications?

A: Yes, this tape is suitable for outdoor use and can withstand exposure to weather elements.
