

## Self Fusing Electrical Insulation Tape 0.8mm Thickness UV Resistant Electrical Tape

Our Product Introduction

more products please visit us on [siliconerubber-product.com](http://siliconerubber-product.com)

### Basic Information

- Place of Origin: China
- Brand Name: zhonglei

### Product Specification

- Uv Resistant: Yes
- Voltage Resistance: Up To 30KV
- Temperature Resistance: Up To 260°C
- Insulation: Yes
- Thickness: 0.8mm
- Color: Black
- Self-Fusing: Yes
- Width: 50mm
- Highlight: Self Fusing Electrical Insulation Tape,  
Electrical Insulation Tape 0.8mm,  
Self Fusing UV Resistant Electrical Tape

## Product Description

### Product Description:

Our Self-Fusing Silicone Tape is specially designed to create a permanent bond when wrapped around itself, without the need for any adhesive. This Self-Amalgamating High Voltage Tape is perfect for various applications such as sealing, insulating, and protecting electrical connections, wires, and cables.

With a thickness of 0.8mm, this Self-Fusing Electrical Tape is strong and provides excellent insulation. Its black color makes it easy to blend in with the surrounding environment, ensuring a clean and professional look. The tape measures 5m in length, providing ample coverage for multiple projects.

Whether you're a professional electrician or a DIY enthusiast, our Self-Fusing Electrical Tape is an essential tool in your arsenal. Its versatility and durability make it suitable for a wide range of electrical applications, such as automotive, marine, and industrial.

Invest in our Self-Fusing Electrical Tape and experience a reliable and long-lasting solution for your electrical needs. Don't settle for anything less than the best, choose our Self-Sealing Insulating Tape today!

### Features:

Product Name: Self Fusing Electrical Tape

Color: Black

Insulation: Yes

Voltage Resistance: Up To 30KV

Self-Fusing: Yes

Adhesive: No

This Self Fusing Electrical Tape is a Self-Bonding Insulating Tape, Self-Sealing Electrical Tape, and Self-Sealing Rubber Tape that comes in black and is fully insulated. It has a voltage resistance of up to 30KV and is self-fusing, meaning it can be easily applied without the need for adhesive.

### Technical Parameters:

Product Attribute	Value
Product Name	Self-Sealing Insulating Tape
Thickness	0.8mm
UV Resistant	Yes
Application	Electrical Insulation and Sealing
Stretchable	Yes
Length	5m
Temperature Resistance	Up to 260°C
Voltage Resistance	Up to 30KV
Self-Fusing	Yes
Width	50mm
Tear Resistant	Yes
Product Type	Self-Bonding Electrical Tape, Self-Fusing Silicone Tape

### Applications:

One of the key benefits of zhonglei Self Fusing Electrical Tape is its self-fusing design, which allows it to bond quickly and securely to itself without the need for additional adhesives. This makes it an ideal solution for situations where traditional tape or adhesive products may not be able to provide the necessary strength and durability. In addition to its self-fusing properties, this tape offers excellent insulation capabilities, helping to protect electrical components and connections from damage due to moisture, heat, or other factors. Thanks to its impressive temperature resistance, zhonglei Self Fusing Electrical Tape is suitable for use in a wide range of environments and scenarios. Whether you're working in a hot, humid factory or a cold, dry outdoor setting, this tape can help you get the job done right. It can withstand temperatures of up to 260°C, making it a great choice for high-temperature applications like engine repair, furnace maintenance, and more.

In addition to its temperature resistance, this tape is also designed to provide superior voltage resistance, with a maximum rating of up to 30KV. This makes it an ideal choice for use in electrical systems and equipment, where high voltages can pose a serious safety risk. With its self-bonding silicone design, zhonglei Self Fusing Electrical Tape can help keep your connections secure and your equipment running smoothly.

Overall, zhonglei Self Fusing Electrical Tape is a versatile and reliable product that can help you tackle a wide range of electrical applications. Whether you're looking for a self-bonding insulating tape, a high-temperature electrical tape, or a durable and long-lasting solution for your industrial needs, this tape is a great choice. With its 0.8mm thickness and superior performance characteristics, it's sure to provide the strength and durability you need to get the job done right.

## Customization:

Customize your zhonglei Self-Fusing Electrical Tape to meet your specific needs!

Our Self-Sealing Insulating Tape is tear-resistant, waterproof, and has a thickness of 0.8mm. Made in China, this tape comes in black color and provides excellent insulation.

Choose from a variety of customization options, including:

Length

Width

Color

Printed logo or design

Our Self-Bonding Insulating Tape is perfect for any electrical, plumbing, or automotive project. With its strong adhesive properties, it bonds quickly and securely to itself and other materials.

Order your zhonglei Self-Bonding Electrical Tape today and get the customized product you need for your project!

## Support and Services:

Our Self Fusing Electrical Tape is a high-quality product that is designed to offer excellent performance in a wide range of applications. This tape is made from premium materials and is designed to provide a strong and reliable bond that will last for years to come.

In addition to its superior bonding capabilities, our Self Fusing Electrical Tape is also highly resistant to a variety of environmental factors, including moisture, extreme temperatures, and UV radiation. This makes it an ideal choice for use in a range of different environments, including outdoor and industrial settings.

If you have any questions about our Self Fusing Electrical Tape or need technical support or services related to the product, our team of experts is always here to help. We have extensive experience working with this tape and can provide guidance on everything from installation to troubleshooting.

## Packing and Shipping:

Product Packaging:

The Self Fusing Electrical Tape is packaged in a durable plastic container that protects the tape from dust, moisture, and other environmental factors. The container has a secure lid that keeps the tape in place during transport and storage. The packaging also includes a label with product information and instructions for use.

Shipping:

Our Self Fusing Electrical Tape is shipped in a sturdy cardboard box that provides additional protection during shipping. The tape is wrapped in bubble wrap or another protective material to prevent damage during transport. We use reliable shipping carriers to ensure that your order arrives safely and on time.

## FAQ:

Q1: What is the brand name of the self fusing electrical tape?

A1: The brand name of the self fusing electrical tape is zhonglei.

Q2: Where is the self fusing electrical tape manufactured?

A2: The self fusing electrical tape is manufactured in China.

Q3: What is the length of the self fusing electrical tape?

A3: The length of the self fusing electrical tape varies by product. Please refer to the product packaging or specifications for more information.

Q4: Is the self fusing electrical tape waterproof?

A4: Yes, the self fusing electrical tape is waterproof and can be used in wet environments.

Q5: What is the maximum temperature that the self fusing electrical tape can withstand?

A5: The maximum temperature that the self fusing electrical tape can withstand varies by product. Please refer to the product packaging or specifications for more information.
