Stretchable Silicone Self Fusing Electrical Tape Waterproof Electrical Adhesive Tape

Our Product Introduction

more products please visit us on siliconerubber-product.com

Basic Information

- Place of Origin: China
- Brand Name: zhonglei

Product Specification

- Self-Fusing: Yes
- Application: Electrical Insulation And Sealing
- Stretchable: Yes
- Waterproof: Yes
- Adhesive: No
- Material: Silicone
- Voltage Resistance: Up To 30KV
- Width: 50mm
- Highlight: **Silicone Self Fusing Electrical Tape,
Stretchable Self Fusing Electrical Tape,
Waterproof Electrical Adhesive Tape**

Product Description

Product Description:

One of the key features of this Self-Bonding Silicone Tape is its stretchability, which allows it to conform to irregular shapes and surfaces. This is particularly useful when working with electrical wires or components that have a non-uniform shape. The tape can be stretched and wrapped around the object, providing a secure and reliable seal.

Another important feature of this Self-Bonding Silicone Tape is its waterproof and tear-resistant properties. This makes it ideal for use in outdoor and marine environments where exposure to moisture and saltwater could cause damage to electrical components. The tape is also resistant to tearing, ensuring that it remains in place and provides long-lasting protection.

When it comes to application, this Self-Bonding Silicone Tape is incredibly versatile. It can be used for electrical insulation, sealing, and repair. Whether you need to insulate a wire or seal a leaky pipe, this tape can get the job done.

In summary, our Self-Bonding Silicone Tape is an excellent choice for anyone who needs a reliable and durable tape for electrical insulation and sealing. With its stretchable, waterproof, and tear-resistant properties, it is perfect for use in harsh environments. So why not give it a try today and see the difference it can make?

Features:

Product Name: Self Fusing Electrical Tape

Application: Electrical Insulation And Sealing

Voltage Resistance: Up To 30KV

Thickness: 0.8mm

Self-Fusing: Yes

Width: 50mm

This Self Fusing Electrical Tape is a Self-Bonding Insulating Tape that is perfect for Electrical Insulation and Sealing. It has a Voltage Resistance of Up to 30KV and a Thickness of 0.8mm. This Self-Bonding Electrical Tape is Self-Fusing, making it easy to use and apply. The Width of the tape is 50mm, ensuring a secure and tight seal. Use this Self-Sealing Insulating Tape for all of your electrical needs.

Technical Parameters:

Tear Resistant	Yes
Voltage Resistance	Up to 30KV
Self-Fusing	Yes
Waterproof	Yes
Adhesive	No
Color	Black
Stretchable	Yes
Material	Silicone
Length	5m
Width	50mm

Applications:

One of the key features of this tape is its self-fusing ability. Also known as Self-Amalgamating High Voltage Tape, this tape fuses to itself when wrapped around a wire or cable, creating a strong, permanent bond. This makes it ideal for use in high voltage applications where the tape needs to withstand extreme temperatures and harsh conditions.

Another advantage of this tape is its self-sealing ability. When wrapped around a leaky pipe or hose, this Self-Sealing Electrical Tape forms a tight seal, preventing further leakage. This feature makes it a useful tool in plumbing and automotive repairs.

The Self Fusing Electrical Tape is also known as Self-Bonding Electrical Tape due to its ability to bond to itself, creating a strong, durable seal that can withstand moisture, heat, and chemicals. This makes it ideal for use in marine and industrial settings where equipment is exposed to harsh conditions.

Whether you are an electrician, plumber, or automotive mechanic, the Self Fusing Electrical Tape from Zhonglei is an essential tool in your toolkit. With its superior insulation, self-fusing, self-sealing, and self-bonding properties, this tape is the go-to solution for all your electrical and sealing needs.

Customization:

Support and Services:

Our Self Fusing Electrical Tape is designed to provide superior protection and insulation for electrical connections. It is made from high-

quality silicone rubber, which ensures excellent resistance to heat, moisture, and chemicals. The tape is self-adhering, which means that it fuses to itself when wrapped around an object, providing a reliable and long-lasting seal. It is ideal for use in a variety of applications, including electrical wiring, plumbing, and automotive repairs.

We offer a range of technical support and services to ensure that you get the most out of your Self Fusing Electrical Tape. Our team of experts is available to answer any questions you may have about the product and its applications. We also provide training and educational resources to help you use the tape safely and effectively. In addition, we offer customization services to meet your specific needs and requirements.

Our commitment to customer satisfaction is second to none. We stand behind our products and services, and we are dedicated to providing you with the highest level of support possible. Contact us today to learn more about our Self Fusing Electrical Tape and how we can help you.

Packing and Shipping:

Product Packaging:

The Self Fusing Electrical Tape is packaged in a compact plastic container. The container is designed to protect the tape from exposure to moisture and dust. The container has a clear window that allows customers to see the tape inside. The packaging also includes instructions on how to use the tape.

Shipping:

The Self Fusing Electrical Tape is shipped in a sturdy cardboard box to ensure safe delivery. The box is labeled with the product name, quantity, and handling instructions. The tape is wrapped in bubble wrap to prevent any damage during transportation.

FAQ:

Q: What is Self Fusing Electrical Tape?

A: Self Fusing Electrical Tape is a type of tape that is made from silicone rubber and adheres to itself without needing any additional adhesive. It is commonly used for electrical insulation and repairs.

Q: What is the brand name of this product?

A: The brand name of this product is Zhonglei.

Q: Where is this product manufactured?

A: This product is manufactured in China.

Q: What are the dimensions of the tape?

A: The dimensions of the tape vary depending on the specific product, but typically the width is between 3/4 inch and 1 inch and the length is around 10 feet.

Q: How does Self Fusing Electrical Tape differ from other types of electrical tape?

A: Self Fusing Electrical Tape differs from other types of electrical tape because it does not require any additional adhesive and adheres to itself. It also has a higher level of insulation and is more resistant to moisture and extreme temperatures.
