50mm Waterproof Self Fusing Silicone Electrical Tape Black Silicone Insulation Tape

Basic Information

Place of Origin: ChinaBrand Name: zhonglei

Product Specification

Length: 5m
Self-Fusing: Yes
Width: 50mm
Waterproof: Yes
Color: Black
Material: Silicone
Insulation: Yes

• Thickness:

Highlight: Waterproof Self Fusing Silicone Electrical Tape,
 50mm Self Fusing Silicone Electrical Tape,

0.8mm

Self Fusing Silicone Insulation Tape

Product Description:

The Self Fusing Electrical Tape is perfect for use in electrical applications where a high voltage resistance is needed. It can withstand voltage resistance of up to 30KV, making it ideal for use in high voltage electrical systems. The tape is also tear-resistant, making it suitable for use in harsh environments where it may be subjected to abrasion or impact.

The Self Fusing Electrical Tape is also an excellent insulator. It provides a reliable and secure insulation that protects electrical components from moisture, dust, and other contaminants. The tape is suitable for use in a wide range of applications, including repairing damaged wires, sealing electrical connections, and insulating electrical components.

The Self Fusing Electrical Tape comes in a classic black color, which makes it easy to identify and use in a variety of applications. The black color also provides excellent UV resistance, ensuring that the tape will not degrade over time due to exposure to sunlight. Overall, the Self Fusing Electrical Tape is a versatile product that is perfect for any electrical application that requires insulation and sealing. It is made of high-quality materials that provide excellent insulation, resistance to tearing, and high voltage resistance. Whether you are repairing damaged wires or sealing electrical connections, the Self Fusing Electrical Tape is the perfect product for you.

Features:

Product Name: Self Fusing Electrical Tape

Waterproof: Yes

Application: Electrical Insulation And Sealing

Thickness: 0.8mm UV Resistant: Yes Self-Fusing: Yes

This Self Fusing Electrical Tape is a versatile self-bonding insulating tape that provides excellent electrical insulation and sealing. With a thickness of 0.8mm, it is perfect for a wide range of applications. It is also waterproof and UV resistant, making it suitable for outdoor use. The self-fusing silicone tape ensures a strong bond and easy application, making it a reliable choice for all your electrical insulation and sealing needs.

Technical Parameters:

Product Attribute	Technical Parameter
Product Name	Self-Sealing Insulating Tape, Self-Bonding Insulating Tape, Self-amalgamating Electrical Tape
Voltage Resistance	Up To 30KV
Width	50mm
Length	5m
Tear Resistant	Yes
Waterproof	Yes
Temperature Resistance	Up To 260°C
Stretchable	Yes
Color	Black
UV Resistant	Yes
Material	Silicone

Applications:

The self-bonding silicone tape is perfect for sealing and repairing electrical connections and wires. It is a reliable solution for insulating and protecting wires and cables from abrasion, moisture, and other environmental factors. The tape is waterproof and can withstand voltage resistance of up to 30KV, making it suitable for use in damp and wet environments.

The self-bonding electrical tape is also ideal for use in automotive and marine applications. It can be used to repair hoses, pipes, and other components that are exposed to heat and chemicals. The tape is resistant to UV rays and can withstand extreme temperatures, making it a durable solution for harsh environments.

Another great application for the self-bonding silicone tape is in the construction industry. It can be used to seal and repair roofing, gutters, and other structures. The tape is easy to apply and can conform to any shape or surface, making it a versatile solution for a wide range of applications.

In addition to its practical applications, the self-bonding electrical tape is also convenient to use. It requires no adhesive and bonds to itself, making it easy to apply and remove. The tape is also reusable, allowing you to use it multiple times and save on costs.

Overall, the self-bonding silicone tape from zhonglei is a reliable and versatile solution for a range of applications. Its waterproof and voltage-resistant properties make it ideal for use in electrical and marine applications, while its durability and ease of use make it a great choice for construction and automotive repairs.

Customization:

Support and Services:

Our Self Fusing Electrical Tape product is designed to provide reliable and long-lasting protection for electrical connections. Made from high-quality silicone rubber, this tape is self-bonding and creates a permanent, moisture-resistant seal that resists cracking and breaking even in extreme temperatures.

Our technical support team is available to assist with any questions or issues you may encounter with this product. We can provide guidance on proper installation techniques and troubleshooting tips to ensure that your electrical connections are secure and protected. In addition, we offer a range of services to help you get the most out of your Self Fusing Electrical Tape. These services include customized training programs, on-site installation assistance, and ongoing maintenance and support to ensure that your electrical systems remain safe and reliable over time.

Packing and Shipping:

Product: Self Fusing Electrical Tape

Description: This self fusing electrical tape is a high-quality silicone rubber tape that is ideal for insulating and protecting electrical connections and wires. It is self-bonding and can withstand high temperatures and harsh environments.

Packaging: The tape comes in a compact roll that is easy to store and use. Each roll is 1 inch wide and 10 feet long.

Shipping: The product will be shipped via standard shipping and will arrive within 5-7 business days. Expedited shipping options are also available at an additional cost.

FAQ:

1. What is Self Fusing Electrical Tape?

Self Fusing Electrical Tape is a type of tape that creates a permanent, airtight, and watertight seal without the need for adhesive. It is typically used for electrical insulation, but also has a variety of other applications.

2. What is the Brand Name of this product?

The Brand Name of this product is zhonglei, a reputable brand from China.

3. What is the Place of Origin of this product?

The Place of Origin of this product is China.

4. What are the dimensions of the tape?

The dimensions of the tape are 0.5 inches in width and 10 feet in length.

5. What temperature range can this tape withstand?

This tape can withstand temperatures ranging from -60°C to 260°C (-76°F to 500°F).
